Generation Plant Website at: <http://www.thurrockpower.co.uk>

Thurrock Power Limited
1st Floor
145 Kensington Church Street
London W8 7LP

Author: Stephanie Geller, Thurrock Power Limited

Version: Final

Date: June 2021

List of Appendices to Consultation Report on SEI

Appendix 1: List of postal consultees

Appendix 2: Ardent Methodology

Appendix 3: SEI notice – original notice sent to postal consultees on 28 April 2021 and published in two local newspapers on 29 April 2021; amended notice published in two local newspapers on 06 April 2021; and updated notice sent to email consultees and postal consultees (under cover of the second consultation letter), and published in the Times and London Gazette on 06 May 2021

Appendix 4: Original consultation letter, 28 April 2021

Appendix 5: SEI consultation notice published on 29 April 2021 in Thurrock Gazette and Gravesend Messenger

Appendix 6: Amended SEI consultation notice published on 06 May 2021 in the Thurrock Gazette And Gravesend Messenger

Appendix 7: Second consultation letter, 30 April 2021

Appendix 8: Photographs of SEI notice affixed to site of proposed development on 06 May 2021

Appendix 9: SEI consultation notice published in the Times and London Gazette on 06 May 2021

Appendix 10: Covering email sent to consultees on 29 April 2021

Appendix 11: List of consultee email addresses

1. Introduction

- 1.1.1 The development for which Thurrock Power Limited ('the Applicant') is seeking consent comprises an electricity generating station made up of reciprocating gas engines with electrical output totalling 600 MW, and batteries with electrical output of 150 MW and storage capacity of up to 600 MWh (referred to as 'the Development'). The Development will be known as the Thurrock Flexible Generation Plant. A full description of the Development can be found in the Environmental Statement ('ES'), Volume 2, Chapter 2 (Project Design) (examination library reference: [APP-045]), and information relating to design evolution and principles of design is contained in the Design Principles Statement (examination library reference: APP-140). As the generating capacity of the scheme is above 50MW, it falls under the definition of a Nationally Significant Infrastructure Project ('NSIP') and therefore requires a Development Consent Order ('DCO') under the Planning Act 2008 ('the Act'). The DCO would authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily for the construction, operation and maintenance of the proposed development.
- 1.1.2 The Applicant's DCO application was submitted to the Secretary of State on 27 May 2020 and was accepted for examination on 24 June 2020. The reference number applied to the DCO application is: EN010092. The examination of the application started on 16 February 2021.
- 1.1.3 On 20 April 2021, the Applicant made an application for a material change to the DCO application in relation to the access arrangements for oversized abnormal indivisible loads ('the material change request') (see covering letter at examination library reference: AS-012). The amendments will require additional land, a new work and a new sub-work to be added to the land affected by the DCO. The changes proposed include the construction of a new area of access road and an addition to the previously proposed access works.
- 1.1.4 In accordance with the Procedural Decision letter issued by the Examining Authority on 26 April 2021 (examination library reference: PD0-12), the Applicant ran a consultation process seeking views on the Supplemental Environmental Information ('SEI') submitted by the Applicant in support of the material change request.
- 1.1.5 The purpose of this report is to show how the Applicant has complied with the Examining Authority's Procedural Decision letter of 26 April 2021 in relation to consulting on the SEI submitted by the Applicant in support of the material change request.

2. SEI Consultation Requirements

- 2.1.1 In the Procedural Decision letter issued by the Examining Authority on 26 April 2021, it was noted that, although there is no statutory requirement for the Applicant to consult on or to publicise the SEI submitted in support of the Applicant's material change request, this was considered desirable in order to ensure that those who may wish to comment on it had the opportunity to do so. The Examining Authority therefore agreed to the Applicant's suggestion that consultation on the SEI be carried out alongside the notification/publicity requirements under the Infrastructure Planning (Compulsory Acquisition) Regulations 2010 ('CA Regulations') and copies of the consultation responses on the SEI be provided to the Examining Authority at the same time as the Certificates of Compliance relating to the consultation on compulsory acquisition.

3. Consultation on SEI Undertaken by the Applicant

Identifying Consultees

- 3.1.1 The Applicant identified that all statutory consultees, including the relevant local authorities, and all parties with land interests affected by the material change request needed to be notified under the CA Regulations, and the same parties were consulted in relation to the Applicant's SEI. A list of parties consulted on the SEI can be found at Appendices 1 and 11.
- 3.1.2 The Applicant identified persons who had an interest in the land affected by the material change request by ongoing engagement with land interests consulted during the consultations undertaken in 2018 and 2019 and by instructing Ardent infrastructure and Regeneration ('Ardent') to conduct a comprehensive land referencing exercise in respect of the additional land required by the proposed changes to the DCO. The full methodology used by Ardent can be found at Appendix 2.
- 3.1.3 In summary, Ardent has conducted a number of Land Registry Title Edition checks subsequent to acceptance of the DCO application by the Planning Inspectorate in June 2020, the most recent of which was on 16 April 2021. Any changes to the relevant land interests were tracked in the updated Book of Reference submitted by the Applicant in support of the material change request. The updated Book of Reference can be found in both clean and tracked versions on the project page of the Planning Inspectorate's website (examination library references: AS-029 and AS0-31, respectively).

Consultation Process

- 3.1.5 Consultation on the SEI was undertaken concurrently with notification/publicity undertaken under Regulations 7 and 8 of the CA Regulations. Both consultations began on 29 April 2021 and closed on 05 June 2021, a period of 35 days.
- 3.1.6 The Applicant publicised the notice of SEI consultation (Appendix 3) in the following ways:
- The original notice was sent under cover of a consultation letter (Appendix 4) by Royal Mail first class post to all consultees for whom the Applicant had postal address details only, on 28 April 2021. A list of the postal addresses is at Appendix 1.
 - The original notice was published in two newspapers circulating in the area local the site of the proposed development, on 29 April 2021. The newspapers are the Thurrock Gazette and Gravesend Messenger, and both are published in hard copy and online. Copies of the notice published on 29 April are at Appendix 5.
 - Subsequent to publication of the SEI notice on 29 April 2021, the Planning Inspectorate confirmed that SEI consultation responses were to be sent direct to the Applicant and not submitted by way of representation to the Planning Inspectorate. The Applicant produced an amended notice of SEI consultation (Appendix 3), which was published in the Thurrock Gazette and the Gravesend Messenger on 06 May 2021. Copies of the amended notice published on 06 May 2021 can be found at Appendix 6.
 - A second consultation letter, enclosing an updated SEI consultation notice, was sent out by Royal Mail 1st class post on 30 April 2021 to all postal consultees, to explain that SEI consultation responses should be sent direct to the Applicant. A copy of that letter can be found at Appendix 7 and a copy of the updated notice is at Appendix 3.

- The updated SEI consultation notice was laminated and displayed at a place at the site of the proposed development that is accessible to the public, from 06 May 2021 to 05 June 2021. Photographs of the site notice in situ are at Appendix 8.
- The updated SEI consultation notice was published in the London Gazette and the Times national newspaper on 06 May 2021. Copies of the notice as published are at Appendix 9.
- The updated SEI consultation notice was published on the Applicant's website, in the 'Documents' section from 06 May 2021 and also on the project page of the Planning Inspectorate's website.
- Consultation letters and a copy of the updated SEI notice were sent by email under cover of a short explanatory email to those consultees for whom the Applicant had email addresses, on 29 April 2021. A copy of the covering email is at Appendix 10 and a list of email addresses is at Appendix 11.
- Throughout the consultation period, copies of the proposed changes to the DCO, revised draft DCO, land plans identifying the additional land and land affected by the proposed changes, a supplemental Book of Reference, a Statement of Reasons setting out why additional land is required and further details of how the acquisition of additional land is to be funded, and an addendum to the Environmental Statement were made available on the project page of the Planning Inspectorate's website (examination library references: AS-012 to AS-037, inclusive) and also in the 'Documents' section of the Applicant's website. It was not possible to make the documents available at a location in the vicinity of the application site due to the current COVID-19 (coronavirus) pandemic and the UK Government's advice relating to health and safety, and the Applicant notes that the Government has issued guidance that a website is a 'place' for the purposes of inspecting documents across all planning regimes.
- The SEI notice and consultation letters made it clear that responses should be sent to the Applicant by email or be made over the telephone and that the consultation would close at 23.59 hours on 05 June 2021.

4. Consultation Responses

4.1.1 The Applicant received 9 responses to the SEI consultation, and these are detailed in Table 1 below, along with the regard had by the Applicant to those responses.

Table 1: Table of Responses to Consultation on SEI

Summary of relevant response	Consultee	Change to SEI? Y/N	The Applicant's regard to the response
<p>Overall, Natural England ('NE') is supportive of the material change request and generally agrees that new impacts to ecological interests are not significant in EIA terms. NE comments that the balance of ecological impacts lies clearly in favour of the alternative access and removal of the causeway from the proposed development. NE raises the issue of licensing requirements for protected species.</p>	<p>Natural England</p>	<p>N</p>	<p>Noted. The applicant will continue to discuss protected species licensing with NE during ongoing engagement.</p>
<p>The Applicant needs to conduct surveys and monitoring to assess hydrology and flood risk impacts of infilling approximately 140m of an interceptor drainage ditch on RWE's land, to ensure the infilling does not adversely impact the RWE site and avoid operational impacts in relation to the road. The Applicant should consult RWE on this matter.</p>	<p>RWE Generation UK Plc</p>	<p>N</p>	<p>Noted. Engagement is ongoing.</p>
<p>No substantive comments on the SEI.</p> <p>Seeks clarification as to whether the alternative access for AILs at the western end of Zone H comprises new carriageway on the west side of, and parallel to,</p>	<p>Highways England</p>	<p>N</p>	<p>There was an error in the ES Addendum (examination library reference: AS-035): as Highways England notes, paragraph 3.1.1 in the ES Addendum</p>

Fort Road, or on the eastern side of Fort Road.			should read “east’, as shown in Figure 3.1.
<p>(Paragraph numbers refer to paragraphs in Port of Tilbury London Limited’s submission dated 05 June 2021)</p> <p>Generally content with the SEI in the context of Port of Tilbury London Limited not being in breach of its requirements in the Tilbury2 DCO.</p> <p>Paragraph 21: It should be ensured that the mitigation measures stated to be required are fully secured through the DCO and certified documents.</p> <p>Paragraph 22: Requires clarification regarding the location of suitable habitat for relocation of any reptiles present within the western extent of the alternative AIL access route.</p> <p>Paragraph 23: Would like to discuss with the Applicant its proposals for revisions to paragraph (4) to article 10 of the draft DCO.</p>	Port of Tilbury London Limited		<p>Paragraph 21: The Applicant does not consider that the Outline Ecological Plan requires amendment at this point. Further details will be provided when producing the final LEMP in due course to discharge requirement 14 and, where applicable, through protected species licence applications.</p> <p>Paragraph 22: To clarify, the land referred to is the remaining common land adjacent to the east of plot 05/05, which lies outside the Tilbury2 order limits.</p> <p>Paragraph 23: Noted. Engagement is ongoing.</p>
The Council has considered the SEI and does not wish to comment on the revised proposal	Castlepoint Borough Council	N	Noted

Openreach records show that Openreach has apparatus in the area of the proposed development and requests to be contacted if that apparatus becomes affected by the Applicant's works	Openreach Limited	N	Noted
Confirms that Colt Technology Services does not have apparatus near the location of the proposed development, but if the boundary of the development site alters new plans should be made available to Catelecom	Catelecom UK Limited	N	Noted
Requested copies of the application documents on USB	Andrew Vickers	N	Consultee directed to the Applicant's website and asked if there was anything in particular he was looking for, but no further response received.
Confirms that Sky Telecommunications Services Limited will not be affected by the proposed development	Sky Telecommunications Services Limited	N	Noted

Changes to the SEI following consultation

4.1.2 As stated in Table 1, above, the applicant has not considered it necessary to make modifications to the SEI as a result of the consultation responses received.

5. Conclusion

5.1.1 All requirements set out in the Examining Authority's procedural decision letter of 26 April 2021 have been complied with and the Applicant has taken into account any consultation responses received and concluded that the SEI submitted in support of the material change request does not require amendment further to the consultation.

Appendix 1: List of Consultees

APPENDIX 1 – LIST OF CONSULTEES

This document sets out the persons whom the Applicant consulted in relation to the Supplemental Environmental Information submitted with its application for a material change request. Where an email address is listed for a party in Appendix 11 then the consultation letter and notices were sent by email; otherwise the letters and notices were sent by first class post. These persons are the same as those notified of the material change request pursuant to the Infrastructure Planning (Compulsory Acquisition) Regulations 2010.

Appendix 2: Ardent Methodology

Thurrock Power Limited – Land Referencing Methodology

Identifying persons with an interest in land

Section 42(1)(d) requires the applicant to consult each person who is within one or more of the categories set out in Section 44 of the Act. The identification of these persons has been an ongoing process since October 2018 by the Applicant's land referencers Ardent.

For this purpose, the land was defined by reference to Section 41(2) of the Act as the land to which the proposed application relates. This includes all persons interested in land within the proposed Order limits which had been set at that point, to reflect what was considered at the time to be the land needed to fulfil the operational requirements of the Thurrock Flexible Generation Plant proposals and the areas of land that may need to be developed as a result.

Persons interested in land outside of the Order limits who could be eligible to make a Part 1 Compensation claim under the Land Compensation Act 1973

A number of properties were identified in the proximity of the proposed development which were predicted as potentially being eligible for a claim because of possible diminution in land value as a result of physical factors. These property owners were identified through land registry searches and land referencing questionnaires were issued to the owners. Where properties were unregistered, land referencing questionnaires were issued to The Owner to identify the correct contact details. Discussions were also held with various key landowner agents to identify residential properties which were within their client's ownership. Parties identified through this process are listed in Part 2b of the Book of Reference.

Land referencing process

In October 2018 formal land referencing questionnaires were issued (sample questionnaire attached) to all identified affected parties within the Order limits. Telephone numbers and email addresses were provided on the letter which accompanied the land referencing questionnaires, allowing parties to make contact if they sought further information on the project.

This was followed by a further round of formal land referencing questionnaires for parties who were yet to respond in November 2018 and in July 2019. Where there was unregistered land within the Order limits, site notices were affixed (sample site notice attached) on or adjacent to the land in order to notify any unregistered interested parties of the project.

These notices were fixed on 23 October 2018 and again on 14th November 2018 and left in situ in advance of the statutory consultation exercise. Where there were unregistered properties, site visits on the above dates were conducted which involved visiting the land and where possible speaking with neighbours to assist in identification of interests. Referencing questionnaires were also hand delivered through the letter boxes.

The Common Land Register was obtained from Thurrock Council which identified parties who had an interest in the common land within the Order limits (incorporating both the freeholders and those persons with a right of common, or 'the commoners'). Ongoing discussions have also continued with the land agent acting on behalf of the owner of the common land.

Thurrock Power Limited – Land Referencing Methodology

Identifying persons with an interest in land

Section 42(1)(d) requires the applicant to consult each person who is within one or more of the categories set out in Section 44 of the Act. The identification of these persons has been an ongoing process since October 2018 by the Applicant's land referencers Ardent.

For this purpose, the land was defined by reference to Section 41(2) of the Act as the land to which the proposed application relates. This includes all persons interested in land within the proposed Order limits which had been set at that point, to reflect what was considered at the time to be the land needed to fulfil the operational requirements of the Thurrock Flexible Generation Plant proposals and the areas of land that may need to be developed as a result.

Persons interested in land outside of the Order limits who could be eligible to make a Part 1 Compensation claim under the Land Compensation Act 1973

A number of properties were identified in the proximity of the proposed development which were predicted as potentially being eligible for a claim because of possible diminution in land value as a result of physical factors. These property owners were identified through land registry searches and land referencing questionnaires were issued to the owners. Where properties were unregistered, land referencing questionnaires were issued to The Owner to identify the correct contact details. Discussions were also held with various key landowner agents to identify residential properties which were within their client's ownership. Parties identified through this process are listed in Part 2b of the Book of Reference.

Land referencing process

In October 2018 formal land referencing questionnaires were issued (sample questionnaire attached) to all identified affected parties within the Order limits. Telephone numbers and email addresses were provided on the letter which accompanied the land referencing questionnaires, allowing parties to make contact if they sought further information on the project.

This was followed by a further round of formal land referencing questionnaires for parties who were yet to respond in November 2018 and in July 2019. Where there was unregistered land within the Order limits, site notices were affixed (sample site notice attached) on or adjacent to the land in order to notify any unregistered interested parties of the project.

These notices were fixed on 23 October 2018 and again on 14th November 2018 and left in situ in advance of the statutory consultation exercise. Where there were unregistered properties, site visits on the above dates were conducted which involved visiting the land and where possible speaking with neighbours to assist in identification of interests. Referencing questionnaires were also hand delivered through the letter boxes.

The Common Land Register was obtained from Thurrock Council which identified parties who had an interest in the common land within the Order limits (incorporating both the freeholders and those persons with a right of common, or 'the commoners'). Ongoing discussions have also continued with the land agent acting on behalf of the owner of the common land.

In October 2018 a round of formal land referencing questionnaires was sent to statutory undertakers within the Order limits to determine the presence of any apparatus. The Applicant also conducted its own enquiries into utilities in the land through engineering consultants.

Where land remained unregistered and of unknown ownership, discussions were held between the Applicant and neighbouring landowners and land agents to assist in determining the land ownership. Where the land remains unknown, or any parties remain unknown, this has been noted in the Book of Reference accordingly. The Applicant will continue to try to identify the missing interests and provide an updated Book of Reference during the examination process if applicable.

The above referencing activities were supported by desktop research through sources such as 192.com, BT Phone Book, Experian and Companies House checks to confirm registered addresses where companies are concerned.

The combination of the above land referencing activities produced a list of interests for the statutory consultation exercise under the Act.

In June 2019 a Land Registry Edition date check was carried out on all previously identified titles to verify the current registered proprietors and identify any changes in ownership that had occurred since titles were first downloaded. Further searches were also conducted with the Land Registry to identify if any previously unregistered land had recently been registered.

Throughout the scheme development and evolution of the Order Limits, where additional land was included within the scheme boundary, further land registry checks were conducted and contact made with registered owners through land referencing questionnaires (supported by contact via phone and email). Further statutory consultation letters were issued to those parties who were newly identified through the above processes and/or had recently taken an interest in land.

On 23rd January, prior to the application submission, a final edition date check was conducted with the Land Registry to identify any final changes to details. This search confirmed there were no further changes to the data already held by the referencing team and documented within the Book of Reference.

The consultee list has been cross checked against the Book of Reference (Document Reference 4.3). The list of Section 42(1)(d) consultees in the consultation report is not identical to the list of parties in the Book of Reference as, for example, there are many additional parties that were consulted who are no longer considered to be an affected party in the submitted Book of Reference. This is due to a combination of changes to the Order Limits removing their interest or changes to the ownership and occupancy of the land removing their interest. It is confirmed that all of the persons in the book of reference have been consulted and are included in the list of Section 42(1)(d) consultees.

Prior to the re-submission of the application, registered company addresses were checked on Companies House to identify any changes. Along with this, a review of the updated commons register was undertaken to identify any updates. On 8th April 2020, an edition date check was conducted with the Land Registry to identify any updates to registered title information. Once the DCO application had been accepted, a further Land Registry edition date check was conducted ahead of issuing the Section 56 notices, to ensure we had identified any new interested parties in order that they could be included in the process and register as an interested party.

In November 2020, a change application was made where there was a reduction of land required. The Land Plans and Book of Reference were updated in tracked changes to reflect this. At the start of

examination in February 2021, a second change application was made, with a further reduction in land. The Land Plans, Book of Reference and Compulsory Acquisition Schedule were amended in tracked changes and submitted. In March 2021, at Deadline 2 of the examination, a set of updated Land Plans and a tracked change version of the Book of Reference were submitted to reflect minor Order Boundary amendments, the removal of Port of London Authority Land, and any changes in land interests.

Most recently, on 16th April 2021, a Land Registry Title Edition Date check was completed, which coincided with the material change application. The Red Line Boundary was increased with additional land parcels added to the Land Plans and Book of Reference. Title documents were also reviewed to ensure all parties with an interest in these new areas and from any existing title registers that had been updated, had been identified and included in the tracked change Book of Reference and Compulsory Acquisition Schedule.

Appendix 3: SEI notice

Thurrock Power Limited

Notice of proposed changes to an accepted Development Consent Order: consultation on submission of supplementary environmental information for EIA development

Thurrock Flexible Generation Plant

An application for development consent ('the DCO application') was submitted by Thurrock Power Limited to the Secretary of State, c/o the Planning Inspectorate, on 27 May 2020 and was accepted for examination on 24 June 2020. The reference number applied to the DCO application is EN010092.

Notice is hereby given that Thurrock Power Limited ('the Applicant') of 1st Floor, 145 Kensington Church Street, London, W8 7LP has made an application to amend the DCO application as made, which change was accepted on 26 April 2021, and is now consulting on the additional environmental information related to the change application ('the Application').

The Thurrock Flexible Generation Plant Development

The DCO application is for an order which would authorise the construction, operation and decommissioning of a gas fired flexible electricity generation plant and battery storage facility in Thurrock, Essex ('the Proposed Development'). The DCO application involves EIA development.

The Proposed Development consists of: reciprocating gas engines with net electrical output totalling 600 MW, batteries with net electrical output of 150 MW and storage capacity of up to 600 MW, associated electrical and control equipment, creation of temporary and permanent private access routes for construction and access in operation including a causeway for the delivery of abnormal indivisible loads by barge, a gas pipeline connection to the gas national transmission system, an electrical export connection via underground cables to the immediately adjacent National Grid Tilbury Substation, and habitat creation or enhancement for protected species translocation and biodiversity gain.

The development consent order ('DCO') would authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily for the construction, operation and maintenance of the Proposed Development.

The Application to amend the DCO application

The Applicant has requested an amendment to the access arrangements for oversized abnormal indivisible loads which requires additional land, a new work and a new sub-work to be added to the land affected by the DCO.

The changes proposed add new land to the application and include the construction of a new work (new area of access road) and an addition to the previously proposed access works. This consultation seeks views on the additional environmental information which has been submitted to support that change.

Copies of the change documents

Copies of the proposed changes, the revised draft Development Consent Order, land plans identifying the additional land and land affected by the provision and an addendum to the ES are available at:

<https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant>

and in the 'Documents' section of the Applicant's website:

<http://thurrockpower.co.uk>

If you require alternative methods for inspection of the application documents, please telephone the applicant on: 0207 186 0580 or email: contact@thurrockpower.co.uk.

We will consider your request and are able to provide guidance on using the project website, provide a USB stick containing the application documents free of charge, and/or offer free loan of the application documents on an electronic document reader during the period for making Representations (see below). Loaned electronic document readers will be delivered to your chosen address by courier arranged by the Applicant and collected after 28 May 2021.

The Applicant would normally make available at least one location for viewing the Application documents in the vicinity of the application site. However, due to the current COVID-19 (coronavirus) pandemic and the UK Government's advice relating to health and safety, we are unable to provide hard copy documents to view at a deposit location in the locality of the Proposed Development site. The Applicant notes that the Government has issued guidance that a website is a 'place' for the purposes of inspecting documents across all planning regimes. We therefore strongly encourage you to take advantage of the electronic methods of viewing the application documents set out above.

Hard copies of the application documents can be requested but will be subject to a maximum charge of £500 for each copy. Requests for electronic or hard copy documents can be made in the following ways:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

The documents will be available for inspection until 28 May 2021.

Making Representations about the additional environmental information

Any person may make representations (including giving notice of any interest in, comment on, or objection to the Application) by registering with the Inspectorate as an Interested Party. All representations must be made using the Inspectorate's Registration and Relevant Representation Form, and give the grounds on which it is made. The form can be accessed and completed on-line using the following web address:

<https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant>

Please note that Representations must be received by 23.59 on 28 May 2021.

All representations submitted will be published on the Inspectorate's website and will be subject to their privacy policy, which can be viewed at: <https://infrastructure.planninginspectorate.gov.uk/help/privacy-and-cookie/>.

It should be noted that the Inspectorate is reviewing its procedures due to the coronavirus outbreak, so please monitor their website for periodic updates. You can sign up for updates using the 'sign up' link on the website.

Further information about the Application can be obtained from the Applicant using the following contact details:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

Thurrock Power Limited

Thurrock Power Limited

Notice of proposed changes to an accepted Development Consent Order: consultation on submission of supplementary environmental information for EIA development

Thurrock Flexible Generation Plant

Deadline for Receipt of Consultation Responses: 5th June 2021

An application for development consent ('the DCO application') was submitted by Thurrock Power Limited to the Secretary of State, c/o the Planning Inspectorate, on 27 May 2020 and was accepted for examination on 24 June 2020. The reference number applied to the DCO application is EN010092.

Notice is hereby given that Thurrock Power Limited ('the Applicant') of 1st Floor, 145 Kensington Church Street, London, W8 7LP has made an application to amend the DCO application as made, which change was accepted on 26 April 2021, and is now consulting on the additional environmental information related to the change application ('the Application').

The Thurrock Flexible Generation Plant Development

The DCO application is for an order which would authorise the construction, operation and decommissioning of a gas fired flexible electricity generation plant and battery storage facility in Thurrock, Essex ('the Proposed Development'). The DCO application involves EIA development.

The Proposed Development consists of: reciprocating gas engines with net electrical output totalling 600 MW, batteries with net electrical output of 150 MW and storage capacity of up to 600 MW, associated electrical and control equipment, creation of temporary and permanent private access routes for construction and access in operation including a causeway for the delivery of abnormal indivisible loads by barge, a gas pipeline connection to the gas national transmission system, an electrical export connection via underground cables to the immediately adjacent National Grid Tilbury Substation, and habitat creation or enhancement for protected species translocation and biodiversity gain.

The development consent order ('DCO') would authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily for the construction, operation and maintenance of the Proposed Development.

The Application to amend the DCO application

The Applicant has requested an amendment to the access arrangements for oversized abnormal indivisible loads which requires additional land, a new work and a new sub-work to be added to the land affected by the DCO.

The changes proposed add new land to the application and include the construction of a new work (new area of access road) and an addition to the previously proposed access works. This consultation seeks views on the additional environmental information which has been submitted to support that change.

Copies of the change documents

Copies of the proposed changes, the revised draft Development Consent Order, land plans identifying the additional land and land affected by the provision and an addendum to the ES are available at:

<https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant>

and in the 'Documents' section of the Applicant's website:

<http://thurrockpower.co.uk>

If you require alternative methods for inspection of the application documents, please telephone the applicant on: 0207 186 0580 or email: contact@thurrockpower.co.uk.

We will consider your request and are able to provide guidance on using the project website, provide a USB stick containing the application documents free of charge, and/or offer free loan of the application documents on an electronic document reader during the period for making Representations (see below). Loaned electronic document readers will be delivered to your chosen address by courier arranged by the Applicant and collected after 5th June 2021.

The Applicant would normally make available at least one location for viewing the Application documents in the vicinity of the application site. However, due to the current COVID-19 (coronavirus) pandemic and the UK Government's advice relating to health and safety, we are unable to provide hard copy documents to view at a deposit location in the locality of the Proposed Development site. The Applicant notes that the Government has issued guidance that a website is a 'place' for the purposes of inspecting documents across all planning regimes. We therefore strongly encourage you to take advantage of the electronic methods of viewing the application documents set out above.

Hard copies of the application documents can be requested but will be subject to a maximum charge of £500 for each copy. Requests for electronic or hard copy documents can be made in the following ways:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

The documents will be available for inspection until 5th June 2021.

Consultation on submission of supplementary environmental information in support of the Applicant's proposed changes to an accepted Development Consent Order

Any person may comment on the submission of supplementary environmental information in support of the Applicant's proposed changes to an accepted DCO. Responses should be made to the Applicant direct and can be made in the following ways:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

Please note that consultation responses must be received by the Applicant by 23.59 on 5th June 2021.

Further information about the Application can be obtained from the Applicant using the contact details above.

Thurrock Power Limited

Thurrock Power Limited

Amended Notice of proposed changes to an accepted Development Consent Order: consultation on submission of supplementary environmental information for EIA development

Thurrock Flexible Generation Plant

Deadline for Receipt of Consultation Responses: 5th June 2021

Please Note: Consultation Responses should be sent to the Applicant (contact details below) and not made by way of representations to the Planning Inspectorate as stated in the Notice published on 29th April 2021, and that the deadline for receipt of consultation responses has been extended from 28th May 2021 until 5th June 2021

An application for development consent ('the DCO application') was submitted by Thurrock Power Limited to the Secretary of State, c/o the Planning Inspectorate, on 27 May 2020 and was accepted for examination on 24 June 2020. The reference number applied to the DCO application is EN010092.

Notice is hereby given that Thurrock Power Limited ('the Applicant') of 1st Floor, 145 Kensington Church Street, London, W8 7LP has made an application to amend the DCO application as made, which change was accepted on 26 April 2021, and is now consulting on the additional environmental information related to the change application ('the Application').

The Thurrock Flexible Generation Plant Development

The DCO application is for an order which would authorise the construction, operation and decommissioning of a gas fired flexible electricity generation plant and battery storage facility in Thurrock, Essex ('the Proposed Development'). The DCO application involves EIA development.

The Proposed Development consists of: reciprocating gas engines with net electrical output totalling 600 MW, batteries with net electrical output of 150 MW and storage capacity of up to 600 MW, associated electrical and control equipment, creation of temporary and permanent private access routes for construction and access in operation including a causeway for the delivery of abnormal indivisible loads by barge, a gas pipeline connection to the gas national transmission system, an electrical export connection via underground cables to the immediately adjacent National Grid Tilbury Substation, and habitat creation or enhancement for protected species translocation and biodiversity gain.

The development consent order ('DCO') would authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily for the construction, operation and maintenance of the Proposed Development.

The Application to amend the DCO application

The Applicant has requested an amendment to the access arrangements for oversized abnormal indivisible loads which requires additional land, a new work and a new sub-work to be added to the land affected by the DCO.

The changes proposed add new land to the application and include the construction of a new work (new area of access road) and an addition to the previously proposed access works. This consultation seeks views on the additional environmental information which has been submitted to support that change.

Dear Sir/Madam

**Thurrock Power Limited (a Statera Energy Group Company)
Proposed Flexible Generation Plant in Thurrock, Essex
Planning Inspectorate Reference: EN010092**

**Notice of Consultation on Submission of Supplementary Environmental Information for
EIA Development
and
Notice of Proposed Changes to an Accepted Development Consent Order under
Regulation 7 of the Infrastructure Planning (Compulsory Acquisition) Regulations 2010**

The purpose of this letter is to inform you that, subsequent to our application for a Development Consent Order ('DCO') being submitted to and accepted by the Secretary of State for Business, Energy and Industrial Strategy, the Examining Authority issued a Procedural Decision letter on 26th April 2021 confirming acceptance of a material change to the application. Copies of our change request, plus supporting information, and of the Examining Authority's Procedural Decision letter can be found on the project page of the Planning Inspectorate's National Infrastructure website:

<https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant>

The changes proposed seek an amendment to the access arrangements for oversized abnormal indivisible loads which requires additional land, a new work and a new sub-work to be added to the land affected by the DCO.

Please find enclosed the following:

1. Notice of Consultation on Submission of Supplementary Environmental Information for EIA Development; and
2. Notice of Proposed Changes to an Accepted Development Consent Order under Regulation 7 of the Infrastructure Planning (Compulsory Acquisition) Regulations 2010.

As a result of the changes being sought in our change application, new land is proposed to be subject to powers of compulsory acquisition. Agreement to its inclusion has not yet been reached with all those affected and, accordingly, the Compulsory Acquisition Regulations require a period of notice and publicity to provide opportunities for those affected to make representations. As stated in the enclosed Notice, representations must be made using the Planning Inspectorate's Registration and Relevant Representation Form, which can be accessed using the following web address:

<https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant>

Please ensure that you quote reference EN010092 in all correspondence with the Planning Inspectorate about our application.

All representations relating to the proposed changes to our application under the Infrastructure Planning (Compulsory Acquisition) Regulations 2010 must be received by the Planning Inspectorate by 23.59pm on 5th June 2021.

We have also submitted supplementary Environmental Information ('SEI') in support of our change request. Whilst there is no statutory requirement to consult on or publicise this information, the Examining Authority considers it desirable for us to do this in order to ensure that those who wish to comment on it have the opportunity to do so. We are therefore providing to you the enclosed Notice of Consultation on Submission of Supplementary Environmental Information for EIA Development and seeking your views on the SEI.

All representations relating to the SEI submitted in support of our change application must be received by the Planning Inspectorate by 23.59pm on 28th May 2021.

If you have any questions or require any further information, please do not hesitate to contact my team:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

Yours sincerely

Andrew Troup

Enc: Notices

Thurrock Power Limited

Regulation 7 of The Infrastructure Planning (Compulsory Acquisition) Regulations 2010

Notice of proposed changes to an accepted Development Consent Order

Thurrock Flexible Generation Plant

An application for development consent ('the DCO application') was submitted by Thurrock Power Limited to the Secretary of State, c/o the Planning Inspectorate, on 27 May 2020 and was accepted for examination on 24 June 2020. The reference number applied to the DCO application is EN010092. This notice concerns changes to that application which are sought by Thurrock Power Limited.

Notice is hereby given that Thurrock Power Limited ('the Applicant') of 1st Floor, 145 Kensington Church Street, London, W8 7LP has made an application to amend the DCO application as made, including changes to the areas of land which would be subject to powers of compulsory acquisition ('the Application') which change was accepted on 26 April 2021.

The Thurrock Flexible Generation Plant Development

The DCO application is for an order which would authorise the construction, operation and decommissioning of a gas fired flexible electricity generation plant and battery storage facility in Thurrock, Essex ('the Proposed Development'). The DCO application involves EIA development.

The Proposed Development consists of: reciprocating gas engines with net electrical output totalling 600 MW, batteries with net electrical output of 150 MW and storage capacity of up to 600 MW, associated electrical and control equipment, creation of temporary and permanent private access routes for construction and access in operation including a causeway for the delivery of abnormal indivisible loads by barge, a gas pipeline connection to the gas national transmission system, an electrical export connection via underground cables to the immediately adjacent National Grid Tilbury Substation, and habitat creation or enhancement for protected species translocation and biodiversity gain.

The development consent order ('DCO') would authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily for the construction, operation and maintenance of the Proposed Development.

The Application to amend the DCO application

The Applicant has requested the following changes to the DCO:

- An amendment to the access arrangements for oversized abnormal indivisible loads which requires additional land, a new work and a new sub-work to be added to the land affected by the DCO.
- A revision to the Book of Reference to include the interests of the Port of Tilbury London Limited (PoTLL) not yet shown on the Land Register but as advised by the Port. This change does not affect the area of land affected but amends the category of interests held to correctly note the interest now held by PoTLL which would be affected by the DCO.

The amendments to the land affected by compulsory acquisition as a result of the changes sought are:

- Plot 01/04 has now been split over two separate sheets reducing the area of Plot 01/04 as listed in the Book of Reference. The area of land which has been removed from plot 01/04 is now included in new plot 05/04 which has been enlarged to the south from the original boundary of plot 01/04 to accommodate a new junction and access road. New rights are sought over 8926.38 square metres

of land being public road (Fort Road), private road (Power Station Approach Road, Fort Road), north of Tilbury Power Station, Tilbury and marked as plot 05/04.

- The addition of new rights over 174.52 square metres of land being hardstanding at Tilbury Power Substation, Tilbury and marked as plot 01/33.
- The addition of new rights over 70.20 square metres of land being grassland, trees and shrubbery at Tilbury Power Substation, Tilbury and marked as plot 01/34.
- The addition of new rights over 370.98 square metres of land being hardstanding and overhead transmission lines, at Tilbury Power Substation, Tilbury and marked as plot 01/35.
- The addition of new rights over 229.15 square metres of land being hardstanding, drain and overhead transmission lines, south of Tilbury Power Substation, Tilbury and marked as plot 01/36.
- The addition of new rights over 3127.85 square metres of land being grassland, hardstanding, trees, shrubbery, drain and overhead transmission lines, south of Tilbury Power Substation, Tilbury and marked as plot 01/37.
- The addition of permanent acquisition of 557.46 square metres of land being grassland, east of Fort Road, Tilbury and marked as plot 05/05. This land is special category land being Common Land. It is proposed to treat this in the same manner as the other Common Land affected by the project as there is scope within the currently proposed replacement land to replace this as well as there is overprovision of replacement land.
- The addition of temporary rights over 364.79 square metres of land being grassland and highway verge, east of Fort Road, West Tilbury and marked as plot 05/06.
- The addition of new rights over 856.34 square metres of land being hardstanding and grassland, east of Fort Road, West Tilbury and marked as plot 05/07.
- The addition of temporary rights over 1994.24 square metres of land being public highway (Fort Road) and highway verge, West Tilbury and marked as plot 05/08.

The land affected by compulsory acquisition is shown on the land plans accompanying the Application. Plots 01/01, 01/02 and 01/03 are no longer used as plot numbers because the Sheet Frames have been updated due to the addition of areas of land and those plots are therefore now located on a different sheet. For the avoidance of doubt the land previously contained within these plot numbers has not been removed and is included in new plots 05/01, 05/02 and 05/03 respectively. There is no change to the size of or rights sought in those plots, this is purely a numbering change.

A map showing the additional land is included at the end of this notice.

The compensation for the additional land proposed to be subject to compulsory acquisition has been allowed for by the Applicant in the budget for the Proposed Development, further details of which are contained in the supplemental funding statement.

Copies of the Application Documents

Copies of the proposed changes, the revised draft Development Consent Order, land plans identifying the additional land and land affected by the provision, a supplemental Book of Reference and a Statement of Reasons setting out why the land is required and further details of how the acquisition of the land is to be funded are available to view electronically and download, free of charge, on the Planning Inspectorate's project website:

<https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant>

and in the 'Documents' section of the Applicant's website:

<http://thurrockpower.co.uk>

If you require alternative methods for inspection of the application documents, please telephone the applicant on: 0207 186 0580 or email: contact@thurrockpower.co.uk.

We will consider your request and are able to provide guidance on using the project website, provide a USB stick containing the application documents free of charge, and/or offer free loan of the application documents on an electronic document reader during the period for making Representations (see below). Loaned electronic document readers will be delivered to your chosen address by courier arranged by the Applicant and collected after 5th June 2021.

The Applicant would normally make available at least one location for viewing the Application documents in the vicinity of the application site. However, due to the current COVID-19 (coronavirus) pandemic and the UK Government's advice relating to health and safety, we are unable to provide hard copy documents to view at a deposit location in the locality of the Proposed Development site. The Applicant notes that the Government has issued guidance that a website is a 'place' for the purposes of inspecting documents across all planning regimes. We therefore strongly encourage you to take advantage of the electronic methods of viewing the application documents set out above.

Hard copies of the application documents can be requested but will be subject to a maximum charge of £500 for each copy. Requests for electronic or hard copy documents can be made in the following ways:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

The application documents will be available for inspection until 5 June 2021.

Making Representations about the Application

Any person may make representations (including giving notice of any interest in, comment on, or objection to the Application) by registering with the Inspectorate as an Interested Party. All representations must be made using the Inspectorate's Registration and Relevant Representation Form, and give the grounds on which it is made. The form can be accessed and completed on-line using the following web address:

<https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant>

If you are unable to complete a registration form online and would like to register your interest, please call the Inspectorate helpline on: 0303 444 5000, quoting the name of the Application and Inspectorate reference: EN010092.

All representations must include details of the maker's name, address and telephone number, along with an outline of the points intended to be made at the examination stage.

Please ensure that you quote reference EN010092 in all correspondence with the Inspectorate about the Application.

Please note that Representations must be received by the Inspectorate by 23.59 on 5th June 2021.

All representations submitted will be published on the Inspectorate's website and will be subject to their privacy policy, which can be viewed at: <https://infrastructure.planninginspectorate.gov.uk/help/privacy-and-cookie/>.

It should be noted that the Inspectorate is reviewing its procedures due to the coronavirus outbreak, so please monitor their website for periodic updates. You can sign up for updates using the 'sign up' link on the website.

Further information about the Application can be obtained from the Applicant using the following contact details:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

The additional land lies to the east of Fort Road, Tilbury, Essex and to the south of the private road running from Tilbury 2 to the for Tilbury B Power Station:

Thurrock Power Limited

Thurrock Power Limited

Notice of proposed changes to an accepted Development Consent Order: consultation on submission of supplementary environmental information for EIA development

Thurrock Flexible Generation Plant

An application for development consent ('the DCO application') was submitted by Thurrock Power Limited to the Secretary of State, c/o the Planning Inspectorate, on 27 May 2020 and was accepted for examination on 24 June 2020. The reference number applied to the DCO application is EN010092.

Notice is hereby given that Thurrock Power Limited ('the Applicant') of 1st Floor, 145 Kensington Church Street, London, W8 7LP has made an application to amend the DCO application as made, which change was accepted on 26 April 2021, and is now consulting on the additional environmental information related to the change application ('the Application').

The Thurrock Flexible Generation Plant Development

The DCO application is for an order which would authorise the construction, operation and decommissioning of a gas fired flexible electricity generation plant and battery storage facility in Thurrock, Essex ('the Proposed Development'). The DCO application involves EIA development.

The Proposed Development consists of: reciprocating gas engines with net electrical output totalling 600 MW, batteries with net electrical output of 150 MW and storage capacity of up to 600 MW, associated electrical and control equipment, creation of temporary and permanent private access routes for construction and access in operation including a causeway for the delivery of abnormal indivisible loads by barge, a gas pipeline connection to the gas national transmission system, an electrical export connection via underground cables to the immediately adjacent National Grid Tilbury Substation, and habitat creation or enhancement for protected species translocation and biodiversity gain.

The development consent order ('DCO') would authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily for the construction, operation and maintenance of the Proposed Development.

The Application to amend the DCO application

The Applicant has requested an amendment to the access arrangements for oversized abnormal indivisible loads which requires additional land, a new work and a new sub-work to be added to the land affected by the DCO.

The changes proposed add new land to the application and include the construction of a new work (new area of access road) and an addition to the previously proposed access works. This consultation seeks views on the additional environmental information which has been submitted to support that change.

Copies of the change documents

Copies of the proposed changes, the revised draft Development Consent Order, land plans identifying the additional land and land affected by the provision and an addendum to the ES are available at:

<https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant>

and in the 'Documents' section of the Applicant's website:

<http://thurrockpower.co.uk>

If you require alternative methods for inspection of the application documents, please telephone the applicant on: 0207 186 0580 or email: contact@thurrockpower.co.uk.

We will consider your request and are able to provide guidance on using the project website, provide a USB stick containing the application documents free of charge, and/or offer free loan of the application documents on an electronic document reader during the period for making Representations (see below). Loaned electronic document readers will be delivered to your chosen address by courier arranged by the Applicant and collected after 28 May 2021.

The Applicant would normally make available at least one location for viewing the Application documents in the vicinity of the application site. However, due to the current COVID-19 (coronavirus) pandemic and the UK Government's advice relating to health and safety, we are unable to provide hard copy documents to view at a deposit location in the locality of the Proposed Development site. The Applicant notes that the Government has issued guidance that a website is a 'place' for the purposes of inspecting documents across all planning regimes. We therefore strongly encourage you to take advantage of the electronic methods of viewing the application documents set out above.

Hard copies of the application documents can be requested but will be subject to a maximum charge of £500 for each copy. Requests for electronic or hard copy documents can be made in the following ways:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

The documents will be available for inspection until 28 May 2021.

Making Representations about the additional environmental information

Any person may make representations (including giving notice of any interest in, comment on, or objection to the Application) by registering with the Inspectorate as an Interested Party. All representations must be made using the Inspectorate's Registration and Relevant Representation Form, and give the grounds on which it is made. The form can be accessed and completed on-line using the following web address:

<https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant>

Please note that Representations must be received by 23.59 on 28 May 2021.

All representations submitted will be published on the Inspectorate's website and will be subject to their privacy policy, which can be viewed at: <https://infrastructure.planninginspectorate.gov.uk/help/privacy-and-cookie/>.

It should be noted that the Inspectorate is reviewing its procedures due to the coronavirus outbreak, so please monitor their website for periodic updates. You can sign up for updates using the 'sign up' link on the website.

Further information about the Application can be obtained from the Applicant using the following contact details:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

Thurrock Flexible Generation Plant

An application for development consent ('the DCO application') was submitted by Thurrock Power Limited to the Secretary of State, c/o the Planning Inspectorate, on 27 May 2020 and was accepted for examination on 24 June 2020. The reference number applied to the DCO application is EN010092.

Notice is hereby given that Thurrock Power Limited ('the Applicant') of 1st Floor, 145 Kensington Church Street, London, W8 7LP has made an application to amend the DCO application as made, which change was accepted on 26 April 2021, and is now consulting on the additional environmental information related to the change application ('the Application').

The Thurrock Flexible Generation Plant Development

The DCO application is for an order which would authorise the construction, operation and decommissioning of a gas fired flexible electricity generation plant and battery storage facility in Thurrock, Essex ('the Proposed Development'). The DCO application involves EIA development.

The Proposed Development consists of: reciprocating gas engines with net electrical output totalling 600 MW, batteries with net electrical output of 150 MW and storage capacity of up to 600 MW, associated electrical and control equipment, creation of temporary and permanent private access routes for construction and access in operation including a causeway for the delivery of abnormal indivisible loads by barge, a gas pipeline connection to the gas national transmission system, an electrical export connection via underground cables to the immediately adjacent National Grid Tilbury Substation, and habitat creation or enhancement for protected species translocation and biodiversity gain.

The development consent order ('DCO') would authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily for the construction, operation and maintenance of the Proposed Development.

The Application to amend the DCO application

The Applicant has requested an amendment to the access arrangements for oversized abnormal indivisible loads which requires additional land, a new work and a new sub-work to be added to the land affected by the DCO.

The changes proposed add new land to the application and include the construction of a new work (new area of access road) and an addition to the previously proposed access works. This consultation seeks views on the additional environmental information which has been submitted to support that change.

Copies of the change documents

Copies of the proposed changes, the revised draft Development Consent Order, land plans identifying the additional land and land affected by the provision and an addendum to the ES are available at: <https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant> and in the 'Documents' section of the Applicant's website: <http://thurrockpower.co.uk>

If you require alternative methods for inspection of the application documents, please telephone the applicant on: 0207 186 0580 or email: contact@thurrockpower.co.uk.

We will consider your request and are able to provide guidance on using the project website, provide a USB stick containing the application documents free of charge, and/or offer free loan of the application documents on an electronic document reader during the period for making Representations (see below). Loaned electronic document readers will be delivered to your chosen address by courier arranged by the Applicant and collected after 28 May 2021.

The Applicant would normally make available at least one location for viewing the Application documents in the vicinity of the application site. However, due to the current COVID-19 (coronavirus) pandemic and the UK Government's advice relating to health and safety, we are unable to provide hard copy documents to view at a deposit location in the locality of the Proposed Development site. The Applicant notes that the Government has issued guidance that a website is a 'place' for the purposes of inspecting documents across all planning regimes. We therefore strongly encourage you to take advantage of the electronic methods of viewing the application documents set out above.

Hard copies of the application documents can be requested but will be subject to a maximum charge of £500 for each copy. Requests for electronic or hard copy documents can be made in the following ways:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

The documents will be available for inspection until 28 May 2021.

Making Representations about the additional environmental information

Any person may make representations (including giving notice of any interest in, comment on, or objection to the Application) by registering with the Inspectorate as an Interested Party. All representations must be made using the Inspectorate's Registration and Relevant Representation Form, and give the grounds on which it is made. The form can be accessed and completed on-line using the following web address: <https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant>

Please note that Representations must be received by 23.59 on 28 May 2021.

All representations submitted will be published on the Inspectorate's website and will be subject to their privacy policy, which can be viewed at: <https://infrastructure.planninginspectorate.gov.uk/help/privacy-and-cookie/>.

It should be noted that the Inspectorate is reviewing its procedures due to the coronavirus outbreak, so please monitor their website for periodic updates. You can sign up for updates using the 'sign up' link on the website.

Further information about the Application can be obtained from the Applicant using the following contact details:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

NEWSQUEST (Essex)

**Section 16 of the Commons Act 2006
Proposed deregistration of common land at:
WALTON COMMON AND TILBURY FORT COMMON (BOTH PART OF COMMON LAND UNIT CL228)**

Diana Mary Cole and James Andrew Cole have applied on behalf of Thurrock Power Limited to the Secretary of State for Environment, Food and Rural Affairs under section 16 of the Commons Act 2006 for land forming part of the above-mentioned registered common land (the "release land") to cease to be so registered. The Planning Inspectorate will decide the application on behalf of the Secretary of State.

The purpose of this application is to enable the development of a flexible generation plant which will provide up to 750MW (net) of electrical generation capacity on a fast response basis when called by the National Grid, together with up to 600MWh of battery storage capacity. The release land at Walton Common is part of the area required for the main development site and the release land at Tilbury Fort Common is part of the area required for an access road.

It is proposed that land (the "replacement land") be registered as common land in place of the release land.

The release land is described in the First Schedule to this notice, and the replacement land is described in the Second Schedule.

Due to Government advice in respect of Coronavirus (COVID-19), a copy of the application will not be left in a public area for viewing. However, a copy of the application form and accompanying documents may be obtained by writing to Burges Salmon LLP, One Glass Wharf, Bristol, BS2 0ZX using reference CY02/47016.8, online in the 'Documents' section of Thurrock Power Limited's website: <http://thurrockpower.co.uk>, emailing Cathryn.tracey@burges-salmon.com or by calling 07807550254. The application form and documents will be available until 27 May 2021.

In view of the pandemic, any representations should, where possible, be sent only by email ON or BEFORE that date to commonlandcasework@planninginspectorate.gov.uk.

Representations sent to The Planning Inspectorate cannot be treated as confidential. They will be copied to the applicant and possibly to other interested parties. To find out more about how the Planning Inspectorate uses and manages personal data, please go to the privacy notice.

FIRST SCHEDULE

(The release land)

The release land is 100,695.37 square metres of Walton Common located to the south of the railway line and 4,640 square metres of Tilbury Fort Common (grid reference 565226, 176106) to the north and west of the National Grid 400 kV Tilbury Substation as shown on the map accompanying the application.

SECOND SCHEDULE

(The replacement land)

The replacement land is an agricultural field north of the railway line, which comprises approximately 115,779.30 square metres of land. This is shown on the map accompanying the application.

PUBLIC NOTICE

Feenan Highway, Tilbury

(Temporary prohibition or restriction on roads)

No. 061 Order 2021

1) The Borough Council of Thurrock, in exercise of their powers under Section 14(1) of the Road Traffic Regulation Act 1984 and all other powers, intends to make an Order the effect of which is to:

Prohibit parking at any time in the layby approx. 20m from the junction with Brennan Road on the eastern side of Feenan Highway.

Prohibit parking at any time in the layby on the western side of Feenan Highway outside 5 to 7 Feenan Highway.

2) The purpose of the Order is to enable telecommunications works to be carried out in the adjacent verge.

3) The Order will come into force on Monday 17th May 2021 until Friday 21st May 2021 daily between the hours of 08:00 and 18:00. It only applies to those days and times when indicated on site by the presence of the appropriate traffic signs in accordance with The Traffic Signs Regulations and General Directions 2016.

4) It is expected that the works will be completed within the above times, however the Order will continue in force for a period not exceeding 18 months or until the works have been completed, whichever is the sooner.

5) If the works are not completed within 18 months, the Order may be extended for a longer period with the approval of the Secretary of State.

PLANNING APPLICATIONS

Thurrock Power Limited

Regulation 8 of The Infrastructure Planning (Compulsory Acquisition) Regulations 2010 Notice of proposed changes to an accepted Development Consent Order Thurrock Flexible Generation Plant

An application for development consent ('the DCO application') was submitted by Thurrock Power Limited to the Secretary of State, c/o the Planning Inspectorate, on 27 May 2020 and was accepted for examination on 24 June 2020. The reference number applied to the DCO application is EN010092. This notice concerns changes to that application which are sought by Thurrock Power Limited.

Notice is hereby given that Thurrock Power Limited ('the Applicant') of 1st Floor, 145 Kensington Church Street, London, W8 7LP has made an application to amend the DCO application as made, including changes to the areas of land which would be subject to powers of compulsory acquisition ('the Application').

The Thurrock Flexible Generation Plant Development

The DCO application is for an order which would authorise the construction, operation and decommissioning of a gas fired flexible electricity generation plant and battery storage facility in Thurrock, Essex ('the Proposed Development'). The DCO application involves EIA development.

The Proposed Development consists of: reciprocating gas engines with net electrical output totalling 600 MW, batteries with net electrical output of 150 MW and storage capacity of up to 600 MW, associated electrical and control equipment, creation of temporary and permanent private access routes for construction and access in operation including a causeway for the delivery of abnormal indivisible loads by barge, a gas pipeline connection to the gas national transmission system, an electrical export connection via underground cables to the immediately adjacent National Grid Tilbury Substation, and habitat creation or enhancement for protected species translocation and biodiversity gain.

The development consent order ('DCO') would authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily for the construction, operation and maintenance of the Proposed Development.

The Application to amend the DCO application

The Applicant has requested the following changes to the DCO:

- An amendment to the access arrangements for oversized abnormal indivisible loads which requires additional land, a new work and a new sub-work to be added to the land affected by the DCO.
- A revision to the Book of Reference to include the interests of the Port of Tilbury London Limited (PoTL) not yet shown on the Land Register but as advised by the Port. This change does not affect the area of land affected but amends the category of interests held to correctly note the interest now held by PoTL which would be affected by the DCO.

The amendments to the land affected by compulsory acquisition as a result of the changes sought are:

- Plot 01/04 has now been split over two separate sheets reducing the area of Plot 01/04 as listed in the Book of Reference. The area of land which has been removed from plot 01/04 is now included in new plot 05/04 which has been enlarged to the south from the original boundary of plot 01/04 to accommodate a new junction and access road. New rights are sought over 8926.38 square metres of land being public road (Fort Road), private road (Power Station Approach Road, Fort Road), north of Tilbury Power Station, Tilbury and marked as plot 05/04.
- The addition of new rights over 174.52 square metres of land being hardstanding at Tilbury Power Substation, Tilbury and marked as plot 01/33.
- The addition of temporary rights over 70.20 square metres of land being grassland, trees and shrubbery at Tilbury Power Substation, Tilbury and marked as plot 01/34.
- The addition of new rights over 370.98 square metres of land being hardstanding and overhead transmission lines, at Tilbury Power Substation, Tilbury and marked as plot 01/35.
- The addition of new rights over 229.15 square metres of land being grassland, drain and overhead transmission lines, south of Tilbury Power Substation, Tilbury and marked as plot 01/36.
- The addition of new rights over 3127.85 square metres of land being grassland, hardstanding, trees, shrubbery, drain and overhead transmission lines, south of Tilbury Power Substation, Tilbury and marked as plot 01/37.
- The addition of permanent acquisition of 557.46 square metres of land being grassland, east of Fort Road, Tilbury and marked as plot 05/05. This land is special category land being Common Land. It is proposed to treat this in the same manner as the other Common Land affected by the project as there is scope within the currently proposed replacement land to replace this as well as there is overprovision of replacement land.
- The addition of temporary rights over 364.79 square metres of land being grassland and highway verge, east of Fort Road, West Tilbury and marked as plot 05/06.
- The addition of new rights over 856.34 square metres of land being hardstanding and grassland, east of Fort Road, West Tilbury and marked as plot 05/07.
- The addition of temporary rights over 1994.24 square metres of land being public highway (Fort Road) and highway verge, West Tilbury and marked as plot 05/08.

The land affected by compulsory acquisition is shown on the land plans accompanying the Application. Plots 01/01, 01/02 and 01/03 are no longer used as plot numbers because the Sheet Frames have been updated due to the addition of areas of land and those plots are therefore now located on a different sheet. For the avoidance of doubt the land previously contained within these plots numbers has not been removed and is included in new plots 05/01, 05/02 and 05/03 respectively. There is no change to the size of or rights sought in those plots, this is purely a numbering change.

- The compensation for the additional land proposed to be subject to compulsory acquisition has been allowed for by the Applicant in the budget for the Proposed Development, further details of which are contained in the supplemental funding statement.
- Copies of the Application Documents**
 - Copies of the proposed changes, the revised draft Development Consent Order, land plans identifying the additional land and land affected by the provision, a supplemental Book of Reference and a Statement of Reasons setting out why the land is required and further details of how the acquisition of the land is to be funded are available to view electronically and download, free of charge, on the Inspectorate's project website: <https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant>
 - and in the 'Documents' section of the Applicant's website: <http://thurrockpower.co.uk>

If you require alternative methods for inspection of the application documents, please telephone the applicant on: 0207 186 0580 or email: contact@thurrockpower.co.uk.

We will consider your request and are able to provide guidance on using the project website, provide a USB stick containing the application documents free of charge, and/or offer free loan of the application documents on an electronic document reader during the period for making Representations (see below). Loaned electronic document readers will be delivered to your chosen address by courier arranged by the Applicant and collected after 5 June 2021.

The Applicant would normally make available at least one location for viewing the Application documents in the vicinity of the application site. However, due to the current COVID-19 (coronavirus) pandemic and the UK Government's advice relating to health and safety, we are unable to provide hard copy documents to view at a deposit location in the locality of the Proposed Development site. The Applicant notes that the Government has issued guidance that a website is a 'place' for the purposes of inspecting documents across all planning regimes. We therefore strongly encourage you to take advantage of the electronic methods of viewing the application documents set out above. Hard copies of the application documents can be requested but will be subject to a maximum charge of £500 for each copy. Requests for electronic or hard copy documents can be made in the following ways:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

The application documents will be available for inspection until 5 June 2021.

Making Representations about the Application

Any person may make representations (including giving notice of any interest in, comment on, or objection to the Application) by registering with the Inspectorate as an Interested Party. All representations must be made using the Inspectorate's Registration and Relevant Representation Form, and give the grounds on which it is made. The form can be accessed and completed on-line using the following web address: <https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant>

If you are unable to complete a registration form online and would like to register your interest, please call the Inspectorate helpline on: 0303 444 5000, quoting the name of the Application and Inspectorate reference: EN010092.

All representations must include details of the maker's name, address and telephone number, along with an outline of the points intended to be made at the examination stage.

Please ensure that you quote reference EN010092 in all correspondence with the Inspectorate about the Application.

Please note that Representations must be received by the Inspectorate by 23.59 on 5 June 2021.

All representations submitted will be published on the Inspectorate's website and will be subject to their privacy policy, which can be viewed at: <https://infrastructure.planninginspectorate.gov.uk/help/privacy-and-cookie/>.

It should be noted that the Inspectorate is reviewing its procedures due to the coronavirus outbreak, so please monitor their website for periodic updates. You can sign up for updates using the 'sign up' link on the website.

Further information about the Application can be obtained from the Applicant using the following contact details:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

Thurrock Power Limited

Thurrock Power Limited

Notice of proposed changes to an accepted Development Consent Order: consultation on submission of supplementary environmental information for EIA development Thurrock Flexible Generation Plant

An application for development consent ('the DCO application') was submitted by Thurrock Power Limited to the Secretary of State, c/o the Planning Inspectorate, on 27 May 2020 and was accepted for examination on 24 June 2020. The reference number applied to the DCO application is EN010092.

Notice is hereby given that Thurrock Power Limited ('the Applicant') of 1st Floor, 145 Kensington Church Street, London, W8 7LP has made an application to amend the DCO application as made, which change was accepted on 26 April 2021, and is now consulting on the additional environmental information related to the change application ('the Application').

The Thurrock Flexible Generation Plant Development

The DCO application is for an order which would authorise the construction, operation and decommissioning of a gas fired flexible electricity generation plant and battery storage facility in Thurrock, Essex ('the Proposed Development'). The DCO application involves EIA development.

The Proposed Development consists of: reciprocating gas engines with net electrical output totalling 600 MW, batteries with net electrical output of 150 MW and storage capacity of up to 600 MW, associated electrical and control equipment, creation of temporary and permanent private access routes for construction and access in operation including a causeway for the delivery of abnormal indivisible loads by barge, a gas pipeline connection to the gas national transmission system, an electrical export connection via underground cables to the immediately adjacent National Grid Tilbury Substation, and habitat creation or enhancement for protected species translocation and biodiversity gain.

The development consent order ('DCO') would authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily for the construction, operation and maintenance of the Proposed Development.

The Application to amend the DCO application

The Applicant has requested an amendment to the access arrangements for oversized abnormal indivisible loads which requires additional land, a new work and a new sub-work to be added to the land affected by the DCO.

The changes proposed add new land to the application and include the construction of a new work (new area of access road) and an addition to the previously proposed access works. This consultation seeks views on the additional environmental information which has been submitted to support that change.

Copies of the change documents

Copies of the proposed changes, the revised draft Development Consent Order, land plans identifying the additional land and land affected by the provision and an addendum to the ES are available at:

<https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant>

and in the 'Documents' section of the Applicant's website:

<http://thurrockpower.co.uk>

If you require alternative methods for inspection of the application documents, please telephone the applicant on: 0207 186 0580 or email: contact@thurrockpower.co.uk.

We will consider your request and are able to provide guidance on using the project website, provide a USB stick containing the application documents free of charge, and/or offer free loan of the application documents on an electronic document reader during the period for making Representations (see below). Loaned electronic document readers will be delivered to your chosen address by courier arranged by the Applicant and collected after 28 May 2021.

The Applicant would normally make available at least one location for viewing the Application documents in the vicinity of the application site. However, due to the current COVID-19 (coronavirus) pandemic and the UK Government's advice relating to health and safety, we are unable to provide hard copy documents to view at a deposit location in the locality of the Proposed Development site. The Applicant notes that the Government has issued guidance that a website is a 'place' for the purposes of inspecting documents across all planning regimes. We therefore strongly encourage you to take advantage of the electronic methods of viewing the application documents set out above.

Hard copies of the application documents can be requested but will be subject to a maximum charge of £500 for each copy. Requests for electronic or hard copy documents can be made in the following ways:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

The documents will be available for inspection until 28 May 2021.

Making Representations about the additional environmental information

Any person may make representations (including giving notice of any interest in, comment on, or objection to the Application) by registering with the Inspectorate as an Interested Party. All representations must be made using the Inspectorate's Registration and Relevant Representation Form, and give the grounds on which it is made. The form can be accessed and completed on-line using the following web address:

<https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant>

Please note that Representations must be received by 23.59 on 28 May 2021.

All representations submitted will be published on the Inspectorate's website and will be subject to their privacy policy, which can be viewed at: <https://infrastructure.planninginspectorate.gov.uk/help/privacy-and-cookie/>.

It should be noted that the Inspectorate is reviewing its procedures due to the coronavirus outbreak, so please monitor their website for periodic updates. You can sign up for updates using the 'sign up' link on the website.

Further information about the Application can be obtained from the Applicant using the following contact details:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

Thurrock Power Limited

Amended Notice of proposed changes to an accepted Development Consent Order: consultation on submission of supplementary environmental information for EIA development
Thurrock Flexible Generation Plant
Deadline for Receipt of Consultation Responses: 5th June 2021

Please Note: Consultation Responses should be sent to the Applicant (contact details below) and not made by way of representations to the Planning Inspectorate as stated in the Notice published on 29th April 2021, and that the deadline for receipt of consultation responses has been extended from 28th May 2021 until 5th June 2021

An application for development consent ('the DCO application') was submitted by Thurrock Power Limited to the Secretary of State, c/o the Planning Inspectorate, on 27 May 2020 and was accepted for examination on 24 June 2020. The reference number applied to the DCO application is EN010092.

Notice is hereby given that Thurrock Power Limited ('the Applicant') of 1st Floor, 145 Kensington Church Street, London, W8 7LP has made an application to amend the DCO application as made, which change was accepted on 26 April 2021, and is now consulting on the additional environmental information related to the change application ('the Application').

The Thurrock Flexible Generation Plant Development

The DCO application is for an order which would authorise the construction, operation and decommissioning of a gas fired flexible electricity generation plant and battery storage facility in Thurrock, Essex ('the Proposed Development'). The DCO application involves EIA development.

The Proposed Development consists of: reciprocating gas engines with net electrical output totalling 600 MW, batteries with net electrical output of 150 MW and storage capacity of up to 600 MW, associated electrical and control equipment, creation of temporary and permanent private access routes for construction and access in operation including a causeway for the delivery of abnormal indivisible loads by barge, a gas pipeline connection to the gas national transmission system, an electrical export connection via underground cables to the immediately adjacent National Grid Tilbury Substation, and habitat creation or enhancement for protected species translocation and biodiversity gain.

The development consent order ('DCO') would authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily for the construction, operation and maintenance of the Proposed Development.

The Application to amend the DCO application

The Applicant has requested an amendment to the access arrangements for oversized abnormal indivisible loads which requires additional land, a new work and a new sub-work to be added to the land affected by the DCO.

The changes proposed add new land to the application and include the construction of a new work (new area of access road) and an addition to the previously proposed access works. This consultation seeks views on the additional environmental information which has been submitted to support that change.

Copies of the change documents

Copies of the proposed changes, the revised draft Development Consent Order, land plans identifying the additional land and land affected by the provision and an addendum to the ES are available at: <https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant> and in the 'Documents' section of the Applicant's website: <http://thurrockpower.co.uk>

If you require alternative methods for inspection of the application documents, please telephone the applicant on: 0207 186 0580 or email: contact@thurrockpower.co.uk.

We will consider your request and are able to provide guidance on using the project website, provide a USB stick containing the application documents free of charge, and/or offer free loan of the application documents on an electronic document reader during the period for making Representations (see below). Loaned electronic document readers will be delivered to your chosen address by courier arranged by the Applicant and collected after 5th June 2021.

The Applicant would normally make available at least one location for viewing the Application documents in the vicinity of the application site. However, due to the current COVID-19 (coronavirus) pandemic and the UK Government's advice relating to health and safety, we are unable to provide hard copy documents to view at a deposit location in the locality of the Proposed Development site. The Applicant notes that the Government has issued guidance that a website is a 'place' for the purposes of inspecting documents across all planning regimes. We therefore strongly encourage you to take advantage of the electronic methods of viewing the application documents set out above.

Hard copies of the application documents can be requested but will be subject to a maximum charge of £500 for each copy. Requests for electronic or hard copy documents can be made in the following ways:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

The documents will be available for inspection until 5th June 2021.

Consultation on submission of supplementary environmental information in support of the Applicant's proposed changes to an accepted Development Consent Order

Any person may comment on the submission of supplementary environmental information in support of the Applicant's proposed changes to an accepted DCO. Responses should be made to the Applicant direct and can be made in the following ways:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

Please note that consultation responses must be received by the Applicant by 23.59 on 5th June 2021. Further information about the Application can be obtained from the Applicant using the contact details above.

Thurrock Power Limited

Thurrock Power Limited

**Regulation 8 of The Infrastructure Planning (Compulsory Acquisition) Regulations 2010
Notice of proposed changes to an accepted Development Consent Order
Thurrock Flexible Generation Plant**

An application for development consent ('the DCO application') was submitted by Thurrock Power Limited to the Secretary of State, c/o the Planning Inspectorate, on 27 May 2020 and was accepted for examination on 24 June 2020. The reference number applied to the DCO application is EN010092. This notice concerns changes to that application which are sought by Thurrock Power Limited.

Notice is hereby given that Thurrock Power Limited ('the Applicant') of 1st Floor, 145 Kensington Church Street, London, W8 7LP has made an application to amend the DCO application as made, including changes to the areas of land which would be subject to powers of compulsory acquisition ('the Application').

The Thurrock Flexible Generation Plant Development

The DCO application is for an order which would authorise the construction, operation and decommissioning of a gas fired flexible electricity generation plant and battery storage facility in Thurrock, Essex ('the Proposed Development'). The DCO application involves EIA development.

The Proposed Development consists of: reciprocating gas engines with net electrical output totalling 600 MW, batteries with net electrical output of 150 MW and storage capacity of up to 600 MW, associated electrical and control equipment, creation of temporary and permanent private access routes for construction and access in operation including a causeway for the delivery of abnormal indivisible loads by barge, a gas pipeline connection to the gas national transmission system, an electrical export connection via underground cables to the immediately adjacent National Grid Tilbury Substation, and habitat creation or enhancement for protected species translocation and biodiversity gain.

The development consent order ('DCO') would authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily for the construction, operation and maintenance of the Proposed Development.

The Application to amend the DCO application

The Applicant has requested the following changes to the DCO:

- An amendment to the access arrangements for oversized abnormal indivisible loads which requires additional land, a new work and a new sub-work to be added to the land affected by the DCO.
- A revision to the Book of Reference to include the interests of the Port of Tilbury London Limited (PoTLL) not yet shown on the Land Register but as advised by the Port. This change does not affect the area of land affected but amends the category of interests held to correctly note the interest now held by PoTLL which would be affected by the DCO.

The amendments to the land affected by compulsory acquisition as a result of the changes sought are:

- Plot 01/04 has now been split over two separate sheets reducing the area of Plot 01/04 as listed in the Book of Reference. The area of land which has been removed from plot 01/04 is now included in new plot 05/04 which has been enlarged to the south from the original boundary of plot 01/04 to accommodate a new junction and access road. New rights are sought over 8926.38 square metres of land being public road (Fort Road), private road (Power Station Approach Road, Fort Road), north of Tilbury Power Station, Tilbury and marked as plot 05/04.
- The addition of new rights over 174.52 square metres of land being hardstanding at Tilbury Power Substation, Tilbury and marked as plot 01/33.
- The addition of new rights over 70.20 square metres of land being grassland, trees and shrubbery at Tilbury Power Substation, Tilbury and marked as plot 01/34.
- The addition of new rights over 370.98 square metres of land being hardstanding and overhead transmission lines, at Tilbury Power Substation, Tilbury and marked as plot 01/35.
- The addition of new rights over 229.15 square metres of land being hardstanding, drain and overhead transmission lines, south of Tilbury Power Substation, Tilbury and marked as plot 01/36.
- The addition of new rights over 3127.85 square metres of land being grassland, hardstanding, trees, shrubbery, drain and overhead transmission lines, south of Tilbury Power Substation, Tilbury and marked as plot 01/37.
- The addition of permanent acquisition of 557.46 square metres of land being grassland, east of Fort Road, Tilbury and marked as plot 05/05. This land is special category land being Common Land. It is proposed to treat this in the same manner as the other Common Land affected by the project as there is scope within the currently proposed replacement land to replace this as well as there is overprovision of replacement land.
- The addition of temporary rights over 364.79 square metres of land being grassland and highway verge, east of Fort Road, West Tilbury and marked as plot 05/06.
- The addition of new rights over 856.34 square metres of land being hardstanding and grassland, east of Fort Road, West Tilbury and marked as plot 05/07.
- The addition of temporary rights over 1994.24 square metres of land being public highway (Fort Road) and highway verge, West Tilbury and marked as plot 05/08.

The land affected by compulsory acquisition is shown on the land plans accompanying the Application. Plots 01/01, 01/02 and 01/03 are no longer used as plot numbers because the Sheet Frames have been updated due to the addition of areas of land and those plots are therefore now located on a different sheet. For the avoidance of doubt the land previously contained within these plots numbers has not been removed and is included in new plots 05/01, 05/02 and 05/03 respectively. There is no change to the size of or rights sought in those plots, this is purely a numbering change.

The compensation for the additional land proposed to be subject to compulsory acquisition has been allowed for by the Applicant in the budget for the Proposed Development, further details of which are contained in the supplemental funding statement.

Copies of the Application Documents

Copies of the proposed changes, the revised draft Development Consent Order, land plans identifying the additional land and land affected by the provision, a supplemental Book of Reference and a Statement of Reasons setting out why the land is required and further details of how the acquisition of the land is to be funded are available to view electronically and download, free of charge, on the Inspectorate's project website:

<https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant> and in the 'Documents' section of the Applicant's website: <http://thurrockpower.co.uk>

If you require alternative methods for inspection of the application documents, please telephone the applicant on: 0207 186 0580 or email: contact@thurrockpower.co.uk.

We will consider your request and are able to provide guidance on using the project website, provide a USB stick containing the application documents free of charge, and/or offer free loan of the application documents on an electronic document reader during the period for making Representations (see below). Loaned electronic document readers will be delivered to your chosen address by courier arranged by the Applicant and collected after 5 June 2021.

The Applicant would normally make available at least one location for viewing the Application documents in the vicinity of the application site. However, due to the current COVID-19 (coronavirus) pandemic and the UK Government's advice relating to health and safety, we are unable to provide hard copy documents to view at a deposit location in the locality of the Proposed Development site. The Applicant notes that the Government has issued guidance that a website is a 'place' for the purposes of inspecting documents across all planning regimes. We therefore strongly encourage you to take advantage of the electronic methods of viewing the application documents set out above.

Hard copies of the application documents can be requested but will be subject to a maximum charge of £500 for each copy. Requests for electronic or hard copy documents can be made in the following ways:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

The application documents will be available for inspection until 5 June 2021.

Making Representations about the Application

Any person may make representations (including giving notice of any interest in, comment on, or objection to the Application) by registering with the Inspectorate as an Interested Party. All representations must be made using the Inspectorate's Registration and Relevant Representation Form, and give the grounds on which it is made. The form can be accessed and completed on-line using the following web address:

<https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant>

If you are unable to complete a registration form online and would like to register your interest, please call the Inspectorate helpline on: 0303 444 5000, quoting the name of the Application and Inspectorate reference: EN010092.

All representations must include details of the maker's name, address and telephone number, along with an outline of the points intended to be made at the examination stage.

Please ensure that you quote reference EN010092 in all correspondence with the Inspectorate about the Application.

Please note that Representations must be received by the Inspectorate by 23.59 on 5 June 2021.

All representations submitted will be published on the Inspectorate's website and will be subject to their privacy policy, which can be viewed at: <https://infrastructure.planninginspectorate.gov.uk/help/privacy-and-cookie/>.

It should be noted that the Inspectorate is reviewing its procedures due to the coronavirus outbreak, so please monitor their website for periodic updates. You can sign up for updates using the 'sign up' link on the website.

Further information about the Application can be obtained from the Applicant using the following contact details:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

PARENTS SLAM NEW UNIFORMS

Furious parents have hit out over "pretentious" and "unnecessarily expensive" uniform changes proposed by a school trust.

Whitehill Primary School in Sun Lane,

Gravesend, wants to ditch blue polo tops for white dress shirts and neck ties, along with £16 jumpers with the school's new logo.

Head teacher Adam Lowing said the trust "will listen to all responses and then give careful considera-

tion as to how we may move forward."

But the idea has been met with disapproval from various parents who likened the attire to that of a "private secondary school".

They say the changes come at a time when families are struggling for cash, and a petition was launched calling for a rethink.

Thurrock Power Limited

Amended Notice of proposed changes to an accepted Development Consent Order: consultation on submission of supplementary environmental information for EIA development

Thurrock Flexible Generation Plant

Deadline for Receipt of Consultation Responses: 5th June 2021

Please Note: Consultation Responses should be sent to the Applicant (contact details below) and not made by way of representations to the Planning Inspectorate as stated in the Notice published on 29th April 2021, and that the deadline for receipt of consultation responses has been extended from 28th May 2021 until 5th June 2021

An application for development consent ('the DCO application') was submitted by Thurrock Power Limited to the Secretary of State, c/o the Planning Inspectorate, on 27 May 2020 and was accepted for examination on 24 June 2020. The reference number applied to the DCO application is EN010092.

Notice is hereby given that Thurrock Power Limited ('the Applicant') of 1st Floor, 145 Kensington Church Street, London, W8 7LP has made an application to amend the DCO application as made, which change was accepted on 26 April 2021, and is now consulting on the additional environmental information related to the change application ('the Application').

The Thurrock Flexible Generation Plant Development

The DCO application is for an order which would authorise the construction, operation and decommissioning of a gas fired flexible electricity generation plant and battery storage facility in Thurrock, Essex ('the Proposed Development'). The DCO application involves EIA development.

The Proposed Development consists of: reciprocating gas engines with net electrical output totalling 600 MW, batteries with net electrical output of 150 MW and storage capacity of up to 600 MW, associated electrical and control equipment, creation of temporary and permanent private access routes for construction and access in operation including a causeway for the delivery of abnormal indivisible loads by barge, a gas pipeline connection to the gas national transmission system, an electrical export connection via underground cables to the immediately adjacent National Grid Tilbury Substation, and habitat creation or enhancement for protected species translocation and biodiversity gain.

The development consent order ('DCO') would authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily for the construction, operation and maintenance of the Proposed Development.

The Application to amend the DCO application

The Applicant has requested an amendment to the access arrangements for oversized abnormal indivisible loads which requires additional land, a new work and a new sub-work to be added to the land affected by the DCO.

The changes proposed add new land to the application and include the construction of a new work (new area of access road) and an addition to the previously proposed access works. This consultation seeks views on the additional environmental information which has been submitted to support that change.

Copies of the change documents

Copies of the proposed changes, the revised draft Development Consent Order, land plans identifying the additional land and land affected by the provision and an addendum to the ES are available at:

<https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant>

and in the 'Documents' section of the Applicant's website:

<http://thurrockpower.co.uk>

If you require alternative methods for inspection of the application documents, please telephone the applicant on: 0207 186 0580 or email: contact@thurrockpower.co.uk.

We will consider your request and are able to provide guidance on using the project website, provide a USB stick containing the application documents free of charge, and/or offer free loan of the application documents on an electronic document reader during the period for making Representations (see below). Loaned electronic document readers will be delivered to your chosen address by courier arranged by the Applicant and collected after 5th June 2021.

The Applicant would normally make available at least one location for viewing the Application documents in the vicinity of the application site. However, due to the current COVID-19 (coronavirus) pandemic and the UK Government's advice relating to health and safety, we are unable to provide hard copy documents to view at a deposit location in the locality of the Proposed Development site. The Applicant notes that the Government has issued guidance that a website is a 'place' for the purposes of inspecting documents across all planning regimes. We therefore strongly encourage you to take advantage of the electronic methods of viewing the application documents set out above.

Hard copies of the application documents can be requested but will be subject to a maximum charge of £500 for each copy. Requests for electronic or hard copy documents can be made in the following ways:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

The documents will be available for inspection until 5th June 2021.

Consultation on submission of supplementary environmental information in support of the Applicant's proposed changes to an accepted Development Consent Order

Any person may comment on the submission of supplementary environmental information in support of the Applicant's proposed changes to an accepted DCO. Responses should be made to the Applicant direct and can be made in the following ways:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

Please note that consultation responses must be received by the Applicant by 23.59 on 5th June 2021.

Further information about the Application can be obtained from the Applicant using the contact details above.

PLANNING APPLICATIONS

Thurrock Power Limited

**Regulation 8 of The Infrastructure Planning (Compulsory Acquisition) Regulations 2010
Notice of proposed changes to an accepted Development Consent Order
Thurrock Flexible Generation Plant**

An application for development consent ('the DCO application') was submitted by Thurrock Power Limited to the Secretary of State, c/o the Planning Inspectorate, on 27 May 2020 and was accepted for examination on 24 June 2020. The reference number applied to the DCO application is EN010092. This notice concerns changes to that application which are sought by Thurrock Power Limited.

Notice is hereby given that Thurrock Power Limited ('the Applicant') of 1st Floor, 145 Kensington Church Street, London, W8 7LP has made an application to amend the DCO application as made, including changes to the areas of land which would be subject to powers of compulsory acquisition ('the Application').

The Thurrock Flexible Generation Plant Development

The DCO application is for an order which would authorise the construction, operation and decommissioning of a gas fired flexible electricity generation plant and battery storage facility in Thurrock, Essex ('the Proposed Development'). The DCO application involves EIA development.

The Proposed Development consists of: reciprocating gas engines with net electrical output totalling 600 MW, batteries with net electrical output of 150 MW and storage capacity of up to 600 MW, associated electrical and control equipment, creation of temporary and permanent private access routes for construction and access in operation including a causeway for the delivery of abnormal indivisible loads by barge, a gas pipeline connection to the gas national transmission system, an electrical export connection via underground cables to the immediately adjacent National Grid Tilbury Substation, and habitat creation or enhancement for protected species translocation and biodiversity gain.

The development consent order ('DCO') would authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily for the construction, operation and maintenance of the Proposed Development.

The Application to amend the DCO application

The Applicant has requested the following changes to the DCO:

- An amendment to the access arrangements for oversized abnormal indivisible loads which requires additional land, a new work and a new sub-work to be added to the land affected by the DCO.
- A revision to the Book of Reference to include the interests of the Port of Tilbury London Limited (PoTLL) not yet shown on the Land Register but as advised by the Port. This change does not affect the area of land affected but amends the category of interests held to correctly note the interest now held by PoTLL which would be affected by the DCO.

The amendments to the land affected by compulsory acquisition as a result of the changes sought are:

- Plot 01/04 has now been split over two separate sheets reducing the area of Plot 01/04 as listed in the Book of Reference. The area of land which has been removed from plot 01/04 is now included in new plot 05/04 which has been enlarged to the south from the original boundary of plot 01/04 to accommodate a new junction and access road. New rights are sought over 8926.38 square metres of land being public road (Fort Road), private road (Power Station Approach Road, Fort Road), north of Tilbury Power Station, Tilbury and marked as plot 05/04.
- The addition of new rights over 174.52 square metres of land being hardstanding at Tilbury Power Substation, Tilbury and marked as plot 01/33.
- The addition of new rights over 70.20 square metres of land being grassland, trees and shrubbery at Tilbury Power Substation, Tilbury and marked as plot 01/34.
- The addition of new rights over 370.98 square metres of land being hardstanding and overhead transmission lines, at Tilbury Power Substation, Tilbury and marked as plot 01/35.
- The addition of new rights over 229.15 square metres of land being hardstanding, drain and overhead transmission lines, south of Tilbury Power Substation, Tilbury and marked as plot 01/36.
- The addition of new rights over 3127.85 square metres of land being grassland, hardstanding, trees, shrubbery, drain and overhead transmission lines, south of Tilbury Power Substation, Tilbury and marked as plot 01/37.
- The addition of permanent acquisition of 557.46 square metres of land being grassland, east of Fort Road, Tilbury and marked as plot 05/05. This land is special category land being Common Land. It is proposed to treat this in the same manner as the other Common Land affected by the project as there is scope within the currently proposed replacement land to replace this as well as there is overprovision of replacement land.
- The addition of temporary rights over 364.79 square metres of land being grassland and highway verge, east of Fort Road, West Tilbury and marked as plot 05/06.
- The addition of new rights over 856.34 square metres of land being hardstanding and grassland, east of Fort Road, West Tilbury and marked as plot 05/07.
- The addition of temporary rights over 1994.24 square metres of land being public highway (Fort Road) and highway verge, West Tilbury and marked as plot 05/08.

The land affected by compulsory acquisition is shown on the land plans accompanying the Application. Plots 01/01, 01/02 and 01/03 are no longer used as plot numbers because the Sheet Frames have been updated due to the addition of areas of land and those plots are therefore now located on a different sheet. For the avoidance of doubt the land previously contained within these plots numbers has not been removed and is included in new plots 05/01, 05/02 and 05/03 respectively. There is no change to the size of or rights sought in those plots, this is purely a numbering change.

- The compensation for the additional land proposed to be subject to compulsory acquisition has been allowed for by the Applicant in the budget for the Proposed Development, further details of which are contained in the supplemental funding statement.
- Copies of the Application Documents
- Copies of the proposed changes, the revised draft Development Consent Order, land plans identifying the additional land and land affected by the provision, a supplemental Book of Reference and a Statement of Reasons setting out why the land is required and further details of how the acquisition of the land is to be funded are available to view electronically and download, free of charge, on the Inspectorate's project website: <https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant>
- and in the 'Documents' section of the Applicant's website:
- <http://thurrockpower.co.uk>

If you require alternative methods for inspection of the application documents, please telephone the applicant on: 0207 186 0580 or email: contact@thurrockpower.co.uk.

We will consider your request and are able to provide guidance on using the project website, provide a USB stick containing the application documents free of charge, and/or offer free loan of the application documents on an electronic document reader during the period for making Representations (see below). Loaned electronic document readers will be delivered to your chosen address by courier arranged by the Applicant and collected after 5 June 2021.

The Applicant would normally make available at least one location for viewing the Application documents in the vicinity of the application site. However, due to the current COVID-19 (coronavirus) pandemic and the UK Government's advice relating to health and safety, we are unable to provide hard copy documents to view at a deposit location in the locality of the Proposed Development site. The Applicant notes that the Government has issued guidance that a website is a 'place' for the purposes of inspecting documents across all planning regimes. We therefore strongly encourage you to take advantage of the electronic methods of viewing the application documents set out above.

Hard copies of the application documents can be requested but will be subject to a maximum charge of £500 for each copy. Requests for electronic or hard copy documents can be made in the following ways:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

• The application documents will be available for inspection until 5 June 2021.

Making Representations about the Application

Any person may make representations (including giving notice of any interest in, comment on, or objection to the Application) by registering with the Inspectorate as an Interested Party. All representations must be made using the Inspectorate's Registration and Relevant Representation Form, and give the grounds on which it is made. The form can be accessed and completed on-line using the following web address:

<https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant>

If you are unable to complete a registration form online and would like to register your interest, please call the Inspectorate helpline on: 0303 444 5000, quoting the name of the Application and Inspectorate reference: EN010092.

All representations must include details of the maker's name, address and telephone number, along with an outline of the points intended to be made at the examination stage.

Please ensure that you quote reference EN010092 in all correspondence with the Inspectorate about the Application.

Please note that Representations must be received by the Inspectorate by 23.59 on 5 June 2021.

All representations submitted will be published on the Inspectorate's website and will be subject to their privacy policy, which can be viewed at: <https://infrastructure.planninginspectorate.gov.uk/help/privacy-and-cookies/>

It should be noted that the Inspectorate is reviewing its procedures due to the coronavirus outbreak, so please monitor their website for periodic updates. You can sign up for updates using the 'sign up' link on the website.

Further information about the Application can be obtained from the Applicant using the following contact details:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

By First Class Post

Dear Sir/Madam

Thurrock Power Limited (a Statera Energy Group Company)
Proposed Flexible Generation Plant in Thurrock, Essex
Planning Inspectorate Reference: EN010092

Notice of Consultation on Submission of Supplementary Environmental Information for EIA Development

I refer to my letter of 28th April 2021 in relation to Thurrock Power Limited's recent application to make a material change to our application for a Development Consent Order.

Please find enclosed amended Notice of Consultation on Submission of Supplementary Environmental Information for EIA Development, which has been updated subsequent to my previous letter and should replace the Notice provided to you with that letter.

Please note that responses to the consultation on the submission of supplementary environmental information for EIA development should be sent directly to Thurrock Power Limited and not made by way of representation to the Planning Inspectorate, as stated in my previous letter, and that the deadline for receipt of those responses has been extended until 5th June 2021. Consultation responses can be submitted in the following ways:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

For the avoidance of doubt, representations relating to the Notice of Proposed Changes to an Accepted Development Consent Order under Regulation 7 of the Infrastructure Planning (Compulsory Acquisition) Regulations 2010 should still be submitted to the Planning Inspectorate, as stated in that Notice and in my original letter.

Yours sincerely

A handwritten signature in black ink on a light-colored background. The signature is cursive and appears to read 'Andrew Troup'.

Enc: Notice

Thurrock Power Limited

Notice of proposed changes to an accepted Development Consent Order: consultation on submission of supplementary environmental information for EIA development

Thurrock Flexible Generation Plant

Deadline for Receipt of Consultation Responses: 5th June 2021

An application for development consent ('the DCO application') was submitted by Thurrock Power Limited to the Secretary of State, c/o the Planning Inspectorate, on 27 May 2020 and was accepted for examination on 24 June 2020. The reference number applied to the DCO application is EN010092.

Notice is hereby given that Thurrock Power Limited ('the Applicant') of 1st Floor, 145 Kensington Church Street, London, W8 7LP has made an application to amend the DCO application as made, which change was accepted on 26 April 2021, and is now consulting on the additional environmental information related to the change application ('the Application').

The Thurrock Flexible Generation Plant Development

The DCO application is for an order which would authorise the construction, operation and decommissioning of a gas fired flexible electricity generation plant and battery storage facility in Thurrock, Essex ('the Proposed Development'). The DCO application involves EIA development.

The Proposed Development consists of: reciprocating gas engines with net electrical output totalling 600 MW, batteries with net electrical output of 150 MW and storage capacity of up to 600 MW, associated electrical and control equipment, creation of temporary and permanent private access routes for construction and access in operation including a causeway for the delivery of abnormal indivisible loads by barge, a gas pipeline connection to the gas national transmission system, an electrical export connection via underground cables to the immediately adjacent National Grid Tilbury Substation, and habitat creation or enhancement for protected species translocation and biodiversity gain.

The development consent order ('DCO') would authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily for the construction, operation and maintenance of the Proposed Development.

The Application to amend the DCO application

The Applicant has requested an amendment to the access arrangements for oversized abnormal indivisible loads which requires additional land, a new work and a new sub-work to be added to the land affected by the DCO.

The changes proposed add new land to the application and include the construction of a new work (new area of access road) and an addition to the previously proposed access works. This consultation seeks views on the additional environmental information which has been submitted to support that change.

Copies of the change documents

Copies of the proposed changes, the revised draft Development Consent Order, land plans identifying the additional land and land affected by the provision and an addendum to the ES are available at:

<https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant>

and in the 'Documents' section of the Applicant's website:

<http://thurrockpower.co.uk>

If you require alternative methods for inspection of the application documents, please telephone the applicant on: 0207 186 0580 or email: contact@thurrockpower.co.uk.

We will consider your request and are able to provide guidance on using the project website, provide a USB stick containing the application documents free of charge, and/or offer free loan of the application documents on an electronic document reader during the period for making Representations (see below). Loaned electronic document readers will be delivered to your chosen address by courier arranged by the Applicant and collected after 5th June 2021.

The Applicant would normally make available at least one location for viewing the Application documents in the vicinity of the application site. However, due to the current COVID-19 (coronavirus) pandemic and the UK Government's advice relating to health and safety, we are unable to provide hard copy documents to view at a deposit location in the locality of the Proposed Development site. The Applicant notes that the Government has issued guidance that a website is a 'place' for the purposes of inspecting documents across all planning regimes. We therefore strongly encourage you to take advantage of the electronic methods of viewing the application documents set out above.

Hard copies of the application documents can be requested but will be subject to a maximum charge of £500 for each copy. Requests for electronic or hard copy documents can be made in the following ways:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

The documents will be available for inspection until 5th June 2021.

Consultation on submission of supplementary environmental information in support of the Applicant's proposed changes to an accepted Development Consent Order

Any person may comment on the submission of supplementary environmental information in support of the Applicant's proposed changes to an accepted DCO. Responses should be made to the Applicant direct and can be made in the following ways:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

Please note that consultation responses must be received by the Applicant by 23.59 on 5th June 2021.

Further information about the Application can be obtained from the Applicant using the contact details above.

Notice of proposed changes to an accepted Development Consent Order: consultation on submission of supplementary environmental information for EIA development

Thurrock Flexible Generation Plant

Deadline for Receipt of Consultation Responses: 5th June 2021

An application for development consent ('the DCO application') was submitted by Thurrock Power Limited to the Secretary of State, c/o the Planning Inspectorate, on 27 May 2020 and was accepted for examination on 24 June 2020. The reference number applied to the DCO application is EN010092.

Notice is hereby given that Thurrock Power Limited ('the Applicant') of 1st Floor, 145 Kensington Church Street, London, W8 7LP has made an application to amend the DCO application as made, which change was accepted on 26 April 2021, and is now consulting on the additional environmental information related to the change application ('the Application').

The Thurrock Flexible Generation Plant Development

The DCO application is for an order which would authorise the construction, operation and decommissioning of a gas fired flexible electricity generation plant and battery storage facility in Thurrock, Essex ('the Proposed Development'). The DCO application involves EIA development.

The Proposed Development consists of: reciprocating gas engines with net electrical output totalling 600 MW, batteries with net electrical output of 150 MW and storage capacity of up to 600 MW, associated electrical and control equipment, creation of temporary and permanent private access routes for construction and access in operation including a causeway for the delivery of abnormal indivisible loads by barge, a gas pipeline connection to the gas national transmission system, an electrical export connection via underground cables to the immediately adjacent National Grid Tilbury Substation, and habitat creation or enhancement for protected species translocation and biodiversity gain.

The development consent order ('DCO') would authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily for the construction, operation and maintenance of the Proposed Development.

The Application to amend the DCO application

The Applicant has requested an amendment to the access arrangements for oversized abnormal indivisible loads which requires additional land, a new work and a new sub-work to be added to the land affected by the DCO.

The changes proposed add new land to the application and include the construction of a new work (new area of access road) and an addition to the previously proposed access works. This consultation seeks views on the additional environmental information which has been submitted to support that change.

Copies of the change documents

Copies of the proposed changes, the revised draft Development Consent Order, land plans identifying the additional land and land affected by the provision and an addendum to the ES are available at: <https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant>

and in the 'Documents' section of the Applicant's website:

<http://thurrockpower.co.uk>

If you require alternative methods for inspection of the application documents, please telephone the applicant on: 0207 186 0580 or email: contact@thurrockpower.co.uk.

We will consider your request and are able to provide guidance on using the project website, provide a USB stick containing the application documents free of charge, and/or offer free loan of the application documents on an electronic document reader during the period for making Representations (see below). Loaned electronic document readers will be delivered to your chosen address by courier arranged by the Applicant and collected after 5th June 2021.

The Applicant would normally make available at least one location for viewing the Application documents in the vicinity of the application site. However, due to the current COVID-19 (coronavirus) pandemic and the UK Government's advice relating to health and safety, we are unable to provide hard copy documents to view at a deposit location in the locality of the Proposed Development site. The Applicant notes that the Government has issued guidance that a website is a 'place' for the purposes of inspecting documents across all planning regimes. We therefore strongly encourage you to take advantage of the electronic methods of viewing the application documents set out above.

Hard copies of the application documents can be requested but will be subject to a maximum charge of £500 for each copy. Requests for electronic or hard copy documents can be made in the following ways:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

The documents will be available for inspection until 5th June 2021.

TOWN PLANNING

DEPARTMENT FOR TRANSPORT TOWN AND COUNTRY PLANNING ACT 1990

The Secretary of State gives notice of the proposal to make an Order under section 247 of the above Act to authorise the stopping up of an irregular shaped western part width of Framwelgate Waterside at Durham in the County of Durham.

If made, the Order would authorise the stopping up only to enable development as permitted by Durham County Council, under reference DM/18/00896/VOC.

Copies of the draft Order and relevant plan may be obtained, free of charge, in the 28 days commencing on 06 May 2021, by emailing nationalcasework@dft.gov.uk quoting NATTRAN/NE/S247/4627.

Any person may object to the making of the proposed order by stating their reasons in writing to the Secretary of State at nationalcasework@dft.gov.uk or National Transport Casework Team, Tyneside House, Skinnerburn Road, Newcastle upon Tyne NE4 7AR, quoting the above reference. Objections should be received by midnight on 03 June 2021. Any person submitting any correspondence is advised that your personal data and correspondence will be passed to the applicant/agent to be considered. If you do not wish your personal data to be forwarded, please state your reasons when submitting your correspondence.

S Zamenzadeh, Casework Manager (3796371)

DEPARTMENT FOR TRANSPORT TOWN AND COUNTRY PLANNING ACT 1990

The Secretary of State gives notice of the proposal to make an Order under section 247 of the above Act to authorise the stopping up and diversion of a length of Footpath no. 105 as lies to the south of Bardfield Road at Claypits Farm at Thaxted in the District of Uttlesford.

If made, the Order would authorise the stopping up only to enable development to be carried out should planning permission be granted by Uttlesford District Council. The Secretary of State gives notice of the draft Order under Section 253 (1) of the 1990 Act.

Copies of the draft Order and relevant plan may be obtained, free of charge, in the 28 days commencing on 06 May 2021 by emailing nationalcasework@dft.gov.uk (quoting NATTRAN/E/S247/4642.

THURROCK POWER LIMITED NOTICE OF PROPOSED CHANGES TO AN ACCEPTED DEVELOPMENT CONSENT ORDER: CONSULTATION ON SUBMISSION OF SUPPLEMENTARY ENVIRONMENTAL INFORMATION FOR EIA DEVELOPMENT THURROCK FLEXIBLE GENERATION PLANT DEADLINE FOR RECEIPT OF CONSULTATION RESPONSES: 5TH JUNE 2021

An application for development consent ('the DCO application') was submitted by Thurrock Power Limited to the Secretary of State, c/o the Planning Inspectorate, on 27 May 2020 and was accepted for examination on 24 June 2020. The reference number applied to the DCO application is EN010092.

Notice is hereby given that Thurrock Power Limited ('the Applicant') of 1st Floor, 145 Kensington Church Street, London, W8 7LP has made an application to amend the DCO application as made, which change was accepted on 26 April 2021, and is now consulting on the additional environmental information related to the change application ('the Application').

The Thurrock Flexible Generation Plant Development

The DCO application is for an order which would authorise the construction, operation and decommissioning of a gas fired flexible electricity generation plant and battery storage facility in Thurrock, Essex ('the Proposed Development'). The DCO application involves EIA development.

The Proposed Development consists of: reciprocating gas engines with net electrical output totalling 600 MW, batteries with net electrical output of 150 MW and storage capacity of up to 600 MW, associated electrical and control equipment, creation of temporary and permanent private access routes for construction and access in operation including a causeway for the delivery of abnormal indivisible loads by barge, a gas pipeline connection to the gas national transmission system, an electrical export connection via underground cables to the immediately adjacent National Grid Tilbury Substation, and habitat creation or enhancement for protected species translocation and biodiversity gain.

Further inform Applicant using Thurrock Powe

The development consent order ('DCO') would authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily for the construction, operation and maintenance of the Proposed Development.

The Application to amend the DCO application

The Applicant has requested an amendment to the access arrangements for oversized abnormal indivisible loads which requires additional land, a new work and a new sub-work to be added to the land affected by the DCO.

The changes proposed add new land to the application and include the construction of a new work (new area of access road) and an addition to the previously proposed access works. This consultation seeks views on the additional environmental information which has been submitted to support that change.

Copies of the change documents

Copies of the proposed changes, the revised draft Development Consent Order, land plans identifying the additional land and land affected by the provision and an addendum to the ES are available at: <https://infrastructure.planninginspectorate.gov.uk/projects/south-east/thurrock-flexible-generation-plant> and in the 'Documents' section of the Applicant's website: <http://thurrockpower.co.uk>

If you require alternative methods for inspection of the application documents, please telephone the applicant on: 0207 186 0580 or email: contact@thurrockpower.co.uk.

We will consider your request and are able to provide guidance on using the project website, provide a USB stick containing the application documents free of charge, and/or offer free loan of the application documents on an electronic document reader during the period for making Representations (see below). Loaned electronic document readers will be delivered to your chosen address by courier arranged by the Applicant and collected after 5th June 2021.

The Applicant would normally make available at least one location for viewing the Application documents in the vicinity of the application site. However, due to the current COVID-19 (coronavirus) pandemic and the UK Government's advice relating to health and safety, we are unable to provide hard copy documents to view at a deposit location in the locality of the Proposed Development site. The Applicant notes that the Government has issued guidance that a website is a 'place' for the purposes of inspecting documents across all planning regimes. We therefore strongly encourage you to take advantage of the electronic methods of viewing the application documents set out above.

Hard copies of the application documents can be requested but will be subject to a maximum charge of £500 for each copy. Requests for electronic or hard copy documents can be made in the following ways:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

The documents will be available for inspection until 5th June 2021.

Consultation on submission of supplementary environmental information in support of the Applicant's proposed changes to an accepted Development Consent Order

Any person may comment on the submission of supplementary environmental information in support of the Applicant's proposed changes to an accepted DCO. Responses should be made to the Applicant direct and can be made in the following ways:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

Please note that consultation responses must be received by the Applicant by 23.59 on 5th June 2021.

Further information about the Application can be obtained from the Applicant using the contact details above.

Thurrock Power Limited

(3796367)

THURROCK POWER LIMITED REGULATION 8 OF THE INFRASTRUCTURE PLANNING (COMPULSORY ACQUISITION) REGULATIONS 2010 NOTICE OF PROPOSED CHANGES TO AN ACCEPTED DEVELOPMENT CONSENT ORDER

THURROCK FLEXIBLE GENERATION PLANT

An application for development consent ('the DCO application') was submitted by Thurrock Power Limited to the Secretary of State, c/o the Planning Inspectorate, on 27 May 2020 and was accepted for examination on 24 June 2020. The reference number applied to the DCO application is EN010092. This notice concerns changes to that application which are sought by Thurrock Power Limited.

Notice is hereby given that Thurrock Power Limited ('the Applicant') of 1st Floor, 145 Kensington Church Street, London, W8 7LP has made an application to amend the DCO application as made, including changes to the areas of land which would be subject to powers of compulsory acquisition ('the Application').

The Thurrock Flexible Generation Plant Development

The DCO application is for an order which would authorise the construction, operation and decommissioning of a gas fired flexible electricity generation plant and battery storage facility in Thurrock, Essex ('the Proposed Development'). The DCO application involves EIA development.

The Proposed Development consists of: reciprocating gas engines with net electrical output totalling 600 MW, batteries with net electrical output of 150 MW and storage capacity of up to 600 MW, associated electrical and control equipment, creation of temporary and permanent private access routes for construction and access in operation including a causeway for the delivery of abnormal indivisible loads by barge, a gas pipeline connection to the gas national transmission system, an electrical export connection via underground cables to the immediately adjacent National Grid Tilbury Substation, and habitat creation or enhancement for protected species translocation and biodiversity gain.

The development consent order ('DCO') would authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily for the construction, operation and maintenance of the Proposed Development.

The Application to amend the DCO application

The Applicant has requested the following changes to the DCO:

- An amendment to the access arrangements for oversized abnormal indivisible loads which requires additional land, a new work and a new sub-work to be added to the land affected by the DCO.
- A revision to the Book of Reference to include the interests of the Port of Tilbury London Limited (PoTLL) not yet shown on the Land Register but as advised by the Port. This change does not affect the area of land affected but amends the category of interests held to correctly note the interest now held by PoTLL which would be affected by the DCO.

The amendments to the land affected by compulsory acquisition as a result of the changes sought are:

- Plot 01/04 has now been split over two separate sheets reducing the area of Plot 01/04 as listed in the Book of Reference. The area of land which has been removed from plot 01/04 is now included in new plot 05/04 which has been enlarged to the south from the original boundary of plot 01/04 to accommodate a new junction and access road. New rights are sought over 8926.38 square metres of land being public road (Fort Road), private road (Power Station Approach Road, Fort Road), north of Tilbury Power Station, Tilbury and marked as plot 05/04.
- The addition of new rights over 174.52 square metres of land being hardstanding at Tilbury Power Substation, Tilbury and marked as plot 01/33.
- The addition of new rights over 70.20 square metres of land being grassland, trees and shrubbery at Tilbury Power Substation, Tilbury and marked as plot 01/34.
- The addition of new rights over 370.98 square metres of land being hardstanding and overhead transmission lines, at Tilbury Power Substation, Tilbury and marked as plot 01/35.
- The addition of new rights over 229.15 square metres of land being hardstanding, drain and overhead transmission lines, south of Tilbury Power Substation, Tilbury and marked as plot 01/36.
- The addition of new rights over 3127.85 square metres of land being grassland, hardstanding, trees, shrubbery, drain and overhead transmission lines, south of Tilbury Power Substation, Tilbury and marked as plot 01/37.

Attachments: Amended SEI Notice .pdf; CA Notice.pdf; Colt Technology Services.pdf

Dear Sir/Madam

Thurrock Power Limited
Proposed Flexible Generation Plant in Thurrock, Essex

Please find attached the following:

1. Covering Letter
2. Notice of Consultation on Submission of Supplementary Environmental Information for EIA Development
3. Notice of Proposed Changes to an Accepted Development Consent Order under Regulation 7 of the Infrastructure Planning (Compulsory Acquisition) Regulations 2010

Please note that responses to the consultation on the submission of supplementary environmental information for EIA development should be sent directly to the Applicant and not by way of representations to the Planning Inspectorate as stated in the covering letter, and that the deadline for receipt of those responses has been extended until 5th June 2021. Consultation responses can be submitted in the following ways:

- Email: contact@thurrockpower.co.uk
- Telephone: 0207 186 0580

For the avoidance of doubt, representations relating to the enclosed Notice of Proposed Changes to an Accepted Development Consent Order under Regulation 7 of the Infrastructure Planning (Compulsory Acquisition) Regulations 2010 should be submitted to the Planning Inspectorate, as stated in the Notice and in the covering letter attached.

Regards,

Andrew Troup
